Möbius Guide To Dream Interpretation:

Dream Interpretation Michele Simmons, Chris McLaughlin, 2004-01-05 The Möbius Guides provide a fascinating overview to help readers come to grips with the basic principles practices and background of each subject area Enlightening and fully accessible these great introductions are ideal for the beginner or for those who simply want to widen their knowledge in different areas This lively introduction shows how we can unravel the symbolic messages behind dream images and build our own directory of dream themes to better understand ourselves and our lives *The Excessive Subject* Molly Anne Rothenberg, 2013-12-24 In *The Excessive Subject A New Theory of Social Change* Molly Anne Rothenberg uncovers an innovative theory of social change implicit in the writings of radical social theorists such as Pierre Bourdieu Michel de Certeau Judith Butler Ernesto Laclau and Slavoj Žižek Through case studies of these writers work Rothenberg illuminates how this new theory calls into question currently accepted views of social practices subject formation democratic interaction hegemony political solidarity revolutionary acts and the ethics of alterity Finding a common dissatisfaction with the dominant paradigms of social structures in the authors she discusses Rothenberg goes on to show that each of these thinkers makes use of Lacan's investigations of the causality of subjectivity in an effort to find an alternative paradigm Labeling this paradigm extimate causality Rothenberg demonstrates how it produces a nondeterminacy so that every subject bears some excess paradoxically this excess is what structures the social field itself Whilst other theories of social change subject formation and political alliance invariably conceive of the elimination of this excess as necessary to their projects the theory of extimate causality makes clear that it is ineradicable To imagine otherwise is to be held hostage to a politics of fantasy As she examines the importance as well as the limitations of theories that put extimate causality to work Rothenberg reveals how the excess of the subject promises a new theory of social change By bringing these prominent thinkers together for the first time in one volume this landmark text will be sure to ignite debate among scholars in the field as well as being an indispensable tool for students The Loom of God Clifford A. Pickover, 2010-08-17 From the mysterious cult of Pythagoras to the awesome mechanics of Stonehenge to the gargoyles and fractals on today's computers mathematics has always been a powerful even divine force in the world In a lively intelligent synthesis of math mysticism and science fiction Clifford Pickover explains the eternal magic of numbers Taking a uniquely humorous approach he appoints readers Chief Historian of an intergalactic museum and sends them along with a quirky cast of characters hurtling through the ages to explore how individuals used numbers for such purposes as predicting the end of the world finding love and winning wars *Walking the Möbius Strip* Johanna Heil, 2016 *Walking the Möbius Strip* locates Richard Powers's fiction at the crossroads of postmodern and post postmodern aesthetics and argues that this paradigm shift shapes the models of knowledge and understanding that underwrite his work The readings of *Plowing the Dark* *Galatea 2.2* and *The Echo Maker* are inspired by Jacques Lacan's image of cognition as a Möbius strip on which different forms of propositional and non propositional knowledge bleed into

and depend upon one another Drawing on feminist epistemology and psychoanalysis this study highlights Powers s interest in the non propositional aspects of cognition that is in all that escapes the frameworks of scientific empiricism and can only be known through the mediation of fictional narrative It reveals a deep dissatisfaction in the novels with the suggestion that knowledge and understanding must be objective and rational and elucidates Powers s idea that fiction can be a powerful tool for integrating various kinds of knowledge
