

Basic Descriptive Statistics

- **Mean:** The mean (also known as average), is obtained by dividing the sum of observed values by the number of observations.
- **Standard Deviation:** The standard deviation gives an idea of how close the **entire set of data** is to the average value. Data sets with a small standard deviation have tightly grouped data. Data sets with large standard deviations have data spread out over a wide range of values.
- **Variance:** Measures how far a **set of numbers** is spread out. A variance of zero indicates that all the values are identical. Variance is always non-negative, a small variance indicates that the data points tend to be very close to the mean (Average value), while a high variance indicates that the data points are very spread out around the mean.
