Methodological Developments in Biochemistry Eric Reid,1971 **Fixation for Electron Microscopy** M.A. (Eric) Hayat,2012-12-02 Fixation for Electron Microscopy presents how to better understand the effects of fixatives on the molecular structure of the cell This book attempts to consider each aspect of fixation including chemical interactions between fixatives and individual cellular substances The chemistry of fixative interactions that are discussed in the book is based primarily on the reactions of a fixative with isolated proteins lipids nucleic acids and carbohydrates The book shows that the correct interpretation of information retrieved from electron micrographs depends on the knowledge of the basic principles underlying the fixation procedure Also the book presents the fixation of both eukaryotic and prokaryotic specimens The special fixation conditions for plant specimens are discussed in detail and have been allotted a whole chapter Also emphasized in this book is the connection between morphology and biochemical aspects of preparatory treatments and the chemical basis of the formation of artifacts This topic is useful in understanding the modifications of cell structures introduced during their processing A guide for recognizing and minimizing major artifacts and fixation faults that are usually encountered is also presented in the book This valuable resource will prove useful to both students and professionals in the field of biology and clinical medicine Specimen preservation researchers can also benefit from this book *JNCI, Journal of the National Cancer Institute* National Cancer Institute (U.S.),1984 *The Golgi Apparatus* James Morré,Hilton H. Mollenhauer,2008-12-11 *The Golgi Apparatus The First 100 Years* traces the first 100 years of Golgi apparatus discovery from the first published accounts from Pavia Italy in 1898 to the Centenary Celebration in Pavia Italy in 1998 and into the decade beyond It is not intended however to be a comprehensive survey but rather to present the perspectives of the authors to summarize their contributions over the past 50 years in parallel with the modern era of Golgi apparatus discovery initiated in 1954 and made possible by the advent of the electron microscope Included are methods of cell fractionation and biochemical analysis leading up to the present where efforts focus heavily on molecular biology Topics where the authors and their colleagues have made substantial and or pioneering contributions are emphasized including Golgi apparatus morphology and structural organization and function especially in plants the existence and importance of cisternal tubules development of methods of plant and animal Golgi apparatus isolation and subfractionation biochemical analyses of highly purified plant and animal Golgi apparatus fractions in comparison to equally highly purified reference fractions *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1985 **Techniques in the Life Sciences** ,1979

Centrifugation in Biology and Medical Science Phillip Sheeler,1981-02-20 Presents a comprehensive account of the various roles that centrifugation takes in biomedical science and the diversity of instrumentation that is available to the researcher Specific applications are discussed noting advantages limitations and other characteristics that are peculiar to each methodological approach Deals with the historical evolution of the various centrifugal approaches so that recent

developments can be appreciated in perspective **Paperbacks in Print** ,1980 *National Union Catalog* ,1983 Includes entries for maps and atlases Revue roumaine de biochimie ,1975 Biology of the Cell ,1976 **Preparative Techniques** Eric Reid,1973 **Whitaker's Cumulative Book List** ,1974 **JNCI, Journal of the National Cancer Institute** National Cancer Institute (U.S.),1984 Journal of the National Cancer Institute ,1984-02 *Membranous Elements and Movement of Molecules* Eric Reid,1977 The Histochemical Journal ,1968 Current Catalog National Library of Medicine (U.S.), **Research Grants Index** National Institutes of Health (U.S.).
