Life and Mind José Manuel Viejo, Mariano Sanjuán, 2023-06-12 This volume provides a broad overview of some cutting edge philosophical topics of growing interest at the juncture between cognitive science and biology The main goal is not to integrate the variety of approaches into a single account but rather to offer diverse perspectives on a collection of selected biological issues of particular philosophical relevance reflecting the plurality of current research in these areas Four conceptual vectors give this volume its coherence Animal and human cognition With respect to animal cognition this volume focuses on self awareness and methodological flaws in the science of animal consciousness Regarding human cognition the authors of this volume address various aspects of so called 4E cognition Genetics The role of genes in the development of mind and life has always been philosophically controversial In this volume the authors address the possibility of considering post genomic genes as natural kinds and the proper analysis of the concept of genotype Teleology This volume addresses issues of evolutionary causality and teleosemantics as well as questions relating to biological teleology and regulation

Evolution Evolution exemplifies better than any other concept the convergence point between philosophy biology and cognitive sciences Among other things the volume deals with the origin of novelties in evolutionary processes from various viewpoints e g cultural evolution and developmental plasticity Despite their disparity all these topics belong to a common naturalistic framework By presenting them in a single volume the editors want to emphasize the need to always conduct philosophical research on mind and life with tangential domains in mind This book is a valuable resource for students and researchers of philosophy with a special interest in life cognition and evolution as well as for biologists and cognitive scientists

Failed Relations REBEKAH. JOHNSTON,2025-06-30 Failed Relations examines the undertheorized ways in which oppressive social circumstances are constitutively relevant to autonomy Self-awareness, self-understanding and self-concept Patricia S. Tomlan,1985 Agency, Freedom, and Responsibility in the Early Heidegger Hans

Pedersen,2020-08-25 This book employs Heidegger s work of the 1920s and early 1930s to develop distinctively Heideggerian accounts of agency freedom and responsibility making the case that Heidegger s thought provides a compelling alternative to the mainstream philosophical accounts of these concepts Hans Pedersen demonstrates that Heidegger s thought can be fruitfully used to develop a plausible alternative understanding of agency that avoids the metaphysical commitments that give rise to the standard free will debate The first several chapters are devoted to working out an account of the ontological structure of human agency specifically focusing on the Heideggerian understanding of the role of mental states causal explanations and deliberation in human agency arguing that action need not be understood in terms of the causal efficacy of mental states In the following chapters building on the prior account of agency Pedersen develops Heideggerian accounts of freedom and responsibility Having shown that action need not be understood causally the Heideggerian view thereby avoids the conflict between free will and determinism that gives rise to the problem of free will and the correlative problem of responsibility **Six Essays on the Subject Methods of Self-help** Ernests Loomis,1898

Radical Critiques of the Law Stephen M. Griffin, Robert C. L. Moffat, 1997 The past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of American law and the institutions of the liberal state In this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take Writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views The resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice A common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting *Radical Critiques of the Law* is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are Proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best
