Lehman, 2005 This introductory textbook is for students who are interested in learning about and establishing healthy marriage family and intimate relationships With divorce rates high and relationships fragile books and courses are needed that help students address important issues regarding relationships The readers of this text examine many important and relevant issues through the lens of theory and research and do so using a written format that is readable understandable and easy to apply to one s life It was written so that each chapter has information that readers will find helpful as they attempt to establish and maintain meaningful healthy relationships There are questions throughout each chapter that help readers focus not only on the material but also on how the material relates to their present and past relationship and family situations The text provides material on the research of John Gottman the object relations theory of Harville Hendrix the solution focused approach of Michele Weiner Davis and the PREP approach to conflict management of Markman Stanley and Blumberg These and other topics discussed are very relevant to students concerns and

are addressed in greater depth than found in most other texts. The emphasis is not just on couple relationships but also on family relationships. Therefore, in this book, there is extensive coverage of family systems theory and the influence of family rules and family structure on the development of families. There is also material on how change produces transitions in family life that must be assimilated into the family structure, for example, when a couple has their first child. Thus, both couple and family issues are addressed throughout the book. For instructors who want to focus their courses on marriage, family, and intimate relationships, this book would be an ideal choice. A Student Study Guide for Use with Living Together in the Family and Pictures of Family Life Lemo Dennis Rockwood, 1935
The Practice of Family Therapy Suzanne Midori Hanna, Derek A. Ball, 2024-12-10
Now in its sixth edition, *The Practice of Family Therapy* comes at a time when traditional approaches to psychotherapy have given way to multidimensional strategies that best serve the needs of diverse groups who are grappling with the many challenges unique to family therapy practice. With expanded coverage of different models along with new developments in evidence-based and postmodern practices, this integrative textbook bridges the gap between science and systemic relational approaches as it guides the reader through each stage of family therapy. Part I lays the groundwork by introducing the first, second, and third generation models of family therapy, teaching the reader to integrate different elements from these models into a systemic structure of practice. Part II explores the practical application of these models, including scripts for specific interventions and newly updated clinical examples that highlight how to effectively work with diverse client populations of today. Students will learn how to make connections between individual symptoms and cutting-edge family practices to respond successfully to cases involving substance abuse, trauma, grief, depression, suicide risk, violence, LGBTQIA families, and severely mentally ill clients and their families. This newly updated and streamlined edition includes fresh information on working with LGBTQIA families and on the family as a resource for suicidal members, and it also includes new discussion of models such as emotion-focused couple therapy and internal family systems. This text also encourages students to think more broadly about community connections as important resources for clients, such as chosen families and cultural identities that affect one's sense of belonging in relationships. With study guides for each model and a glossary to review main concepts, this text is a comprehensive and accessible guide for students and practitioners. Aligned with the knowledge and content statements of the Association of Marital and Family Therapy Regulatory Boards (AMFTRB), this textbook will be key reading for graduate students who are preparing for the national licensing exam in marriage and family therapy.
