Mapmakers Eye:

The mapmaker's eye: David Thompson on the Columbia Plateau Jack Nisbet, 2005 Author Jack Nisbet utilizes fresh research to convey how Thompson experienced the full sweep of the human and natural history etched across the Columbia drainage He places Thompson s movements within the larger contexts of the European Enlightenment the British fur trade economy and American expansion as represented by Lewis and Clark Packed with illustrations photographs and maps The Mapmaker s Eye is a chronicle of Thompson s life and adventures especially in the Columbia country Jacket The Mapmakers' Legacy Joan Dawson, 2007 This book is a follow up to Joan Dawson s earlier book The Mapmaker s Eye which shows how early maps of Nova Scotia reflect the province s establishment under first French then English colonial rule The present book looks at Nova Scotia s continuing development in the nineteenth century first as a British colony then as a member of Confederation as reflected in the many different types of maps made for various purposes during the century Any map or history enthusiast will be fascinated by Nova Scotia s evolution from a colony of military outposts and subsistence farmers to an increasingly industrial society Early in the nineteenth century maps reflected the settlement that was still taking place the roads being built to link the settlements the increasingly sophisticated defenses that were being constructed and the attempts to identify the resources on which development would depend In the second half of the century maps began to change depicting the development of industries the establishment of railways and shipping lines and the growth of towns where enterprising manufacturers and merchants were setting up businesses Throughout The Mapmakers Legacy Dawson examines and explains the many maps that illustrate this evolution This is a unique and captivating account of Nova Scotian cartographic history The Mapmaker's Apprentice C.J. Archer, 2016-10-25 USA TODAY BESTSELLER When an apprentice from the Mapmakers Guild goes missing Matt and India are employed to find him Going undercover as a married couple they discover that not everyone at the guild is what they seem and the lad s unearthly maps caused jealousy suspicion and fear With one of the apprentice s magic maps in their possession India and Matt must use their wits and India s fledgling untried magic to find him But the more they investigate the more sinister plots they uncover including a link between the Mapmakers and Watchmakers Guilds and an ancient magical treasure buried beneath the streets of London As the net of suspicion widens and enemies draw closer it s not just the apprentice s life that s in danger but Matt s too Someone will go to great lengths to prevent him discovering the name of the man who can fix the watch keeping him alive Great lengths indeed *Homelands and Empires* Jeffers Lennox, 2017-05-08 The period from 1690 to 1763 was a time of intense territorial competition during which Indigenous peoples remained a dominant force British Nova Scotia and French Acadia were imaginary places that administrators hoped to graft over the ancestral homelands of the Mi kmaq Wulstukwiuk Passamaquoddy and Abenaki peoples *Homelands and Empires* is the inaugural volume in the University of Toronto Press s Studies in Atlantic Canada History In this deeply researched and engagingly argued work Jeffers Lennox reconfigures our

general understanding of how Indigenous peoples imperial forces and settlers competed for space in northeastern North America before the British conquest in 1763 Lennox's judicious investigation of official correspondence treaties newspapers and magazines diaries and maps reveals a locally developed system of accommodation that promoted peaceful interactions but enabled violent reprisals when agreements were broken This outstanding contribution to scholarship on early North America questions the nature and practice of imperial expansion in the face of Indigenous territorial strength *A History of the World in 12 Maps* Jerry Brotton, 2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph *Worldly Consumers* Genevieve Carlton, 2015-06-22 This book focuses on how inexpensive maps produced for the masses accrued cultural value for everyday consumers in Renaissance Italy who wanted to own and display maps in their homes as works of art not for practical use but for their cultural capital as commodities Genevieve Carlton considers how and why maps took on this new identity as coveted and revered material objects and symbols of status and power which in turn elevated or reinforced the public personae of their owners She reconstructs the market for maps by examining household inventories as well as the ways in which maps were displayed in the interiors of Renaissance homes Her survey shows that consumers from every level of society owned and displayed maps and used them for personal gain to reinforce a particular identity **Explorers of the American West** Jay H. Material History Review ,1991 [The Island of Seven Cities](#) Paul Chiasson,2013-09-10 The Island of Seven Cities unveils the first tangible proof that the Chinese settled in the New World before Columbus In the summer of 2003 architect Paul Chiasson decided to climb a mountain he had never explored on Cape Breton Island where eight generations of his Acadian family had lived One of the oldest points of exploration and settlement in the Americas with a written history dating back to the first days of European discovery Cape Breton is littered with remnants of old settlements But that day Chiasson found a road that was unique Well made and consistently wide and at one time clearly bordered with stone walls the road had been a major undertaking But he could find no record of it In the two years of detective work that followed Chiasson systematically surveyed the history of Europeans in North America and came to a stunning conclusion the ruins he had stumbled upon an entire townsite on a mountaintop did not belong to the Portuguese the French the English or the Scots And they predated John Cabot s 1497 discovery of the island Using aerial and site photographs maps and drawings and his own expertise as an architect Chiasson re creates how he pieced together the clues to one of the world s great mysteries a large Chinese colony existed and thrived on Canadian shores well before the European Age of Discovery He addresses how the ruins had been previously overlooked or misunderstood and how the colony was abandoned and forgotten in China and in the New World And he discovers the traces the colony left in the storytelling and culture of the Mi kmaq whose written language clothing technical knowledge religious beliefs and legends he argues expose deep cultural ties to China A gripping account of an earth shaking discovery The Island of Seven Cities will change the way we think about our world [The Mapmaker's Art](#)
