Maps Windows:

Microsoft Mapping Ray Rischpater, Carmen Au, 2013-11-30 Geospatial mapping applications have become hugely popular in recent years. With smart phone and tablet numbers snowballing, this trend looks set to continue well into the future. Indeed, it is true to say that in today's mobile world, location-aware apps are becoming the norm rather than the exception. In *Microsoft Mapping*, author Ray Rischpater showcases Microsoft's Bing Maps API and demonstrates how its integration features make it by far the strongest mapping candidate for business that are already using Windows 8 or the .NET Framework. Whether you want to build a new app from scratch or add a few modest geospatial features to your existing website, Ray's carefully chosen examples will provide you with both the inspiration and the code you need to achieve your goals.
