Richard Buckminster Fuller, 1970 *Nine Chains to the Moon* Richard Buckminster Fuller, 1938 *Nine Chains to the Moon* Robert Marks, 1963 [Nine Chains to the Moon](#) Richard Buckminster Fuller (Ingénieur), 1938 *Moral Energy in America* Rebecca K. Wright, 2025-04-29 How a distinctly American way of thinking about energy shaped US culture and society from the Progressive Era to the atomic bomb In *Moral Energy in America* Rebecca K Wright offers an illuminating exploration of how the concept of energy shaped American thought culture and politics throughout the first half of the twentieth century This essential history traces how politicians sociologists geographers urban planners economists and intellectuals adopted the idea of energy to bolster their social programs and visions of the future through distinctive energy imaginaries Energy was not a stable concept in the period and it appealed to writers and advocates across the political and cultural spectrum While medical practitioners and social workers interwove energy into discussions of race immigration youth and crime mainstream political campaigns appealed to the public by drawing energy into political rhetoric Wright positions energy at the heart of key intellectual debates of the period such as the Bourne Dewey confrontation over America's role in World War I and the rise of technocratic ideas that envisioned energy as a new metric for societal progress In a thirty year era that shook the foundations of American democracy a period punctuated by the Great Depression the rise of communism and fascism abroad two world wars and the atomic bomb energy became a key metaphor through which to understand major transformations in American society Wright demonstrates how energy's many meanings transcended material and scientific definitions to influence everything from racial theories to economic policies and ultimately played a pivotal role in molding the American moral landscape

[Impossible Heights](#) Adnan Morshed, 2015-01-15 The advent of the airplane and skyscraper in 1920s and 30s America offered the population an entirely new way to look at the world from above The captivating image of an airplane flying over the rising metropolis led many Americans to believe a new civilization had dawned In *Impossible Heights* Adnan Morshed examines the aesthetics that emerged from this valorization of heights

and their impact on the built environment The lofty vantage point from the sky ushered in a modernist impulse to cleanse crowded twentieth century cities in anticipation of an ideal world of tomorrow Inspired by great new heights American architects became central to this endeavor and were regarded as heroic aviators Combining close readings of a broad range of archival sources Morshed offers new interpretations of works such as Hugh Ferriss s Metropolis drawings Buckminster Fuller s Dymaxion houses and Norman Bel Geddes s Futurama exhibit at the 1939 New York World s Fair Transformed by the populist imagination into master builders these designers helped produce a new form of visuality the aesthetics of ascension By demonstrating how aerial movement and height intersect with popular superman discourses of the time Morshed reveals the relationship between architecture art science and interwar pop culture Featuring a marvelous array of never before published illustrations this richly textured study of utopian imaginings illustrates America s propulsion into a new cultural consciousness
