Inside Reality Dr. Thomas Stark, There are those such as scientists who see only the outside of reality its appearance its surface its phenomenal aspect They are blind to the inside the substance the foundation the noumenal aspect They dismiss it as non existent or illusion or epiphenomenon Scientists are those that believe that phenomena have no underlying noumena What you see is what you get Seeing is believing Everything is appearance Nothing is concealed There are no hidden variables and no unobservables The scientific method says Observe That works only if everything is observable If there are foundational unobservables science is catastrophically wrong and has cut itself off from the truth The only truth it can furnish is that of surfaces and appearances with no substance Those who truly want to understand reality must become masters of both perspectives inside and outside noumenon and phenomenon and see how they relate communicate and interact The Four States of Reality Dr. Jonathan Sumer,2018-12-13 As we explore the four states of reality it brings forth two hypothetical systems of physics that are of the author s creation the reallusion hypothesis and the two spectrums of energy hypothesis The reallusion hypothesis proposes that the universe is not an external presence of matter space energy and time that exists separate and independent to our own physical essence and our consciousness but rather the universe and our own physical essence are each the product of a virtual reality like process that is expressed within our consciousness as our consciousness is created within the physics of our mind and as our mind encompasses more than just our brain If we could explore into the levels of order that precede the subatomic level the universe would revert into the embodiment of all that our mind encompasses revealing that our mind transcends the boundaries of our perceived essence within processes that create our consciousness and the universe within it The first three states of reality correspond to the three stages of the reallusion process where code and data are processed into the creation of conscious perspective and independent thought The fourth state of reality corresponds to the afterlife The two spectrums of energy hypothesis explores how our conscious perspective of the universe is created within two spectrums of code and data *Virtual Reality: The Last Human Narrative?* Thorsten Botz-Bornstein,2015-07-14 Is virtual reality the latest grand narrative that humanity has produced Our civilization is determined by a shift from an original event to a virtual narrative This concerns not only virtual reality but also psychoanalysis gene technology and globalization Psychoanalysis transforms the dream into a narrative and is able to spell out the dream s symbols Gene technology narrates dynamic self evolving evolution as a gene code Discourses on globalization let the globe appear as once more globalized because reproduced through narrative Finally reality itself has come to be narrated in the form of a second reality that is called virtual This book attempts to disentangle the characteristics of human reality and posthuman virtual reality and asks whether it is possible to reconcile both Communication Yearbooks Vols 6-33 Set Various,2021-12-02 The Communication Yearbook annuals originally published between 1977 and 2009 publish diverse state of the discipline literature reviews that advance knowledge and understanding of communication

On the Nature and Origin of Time, Space, Gravity and Reality Jonathan P. Sumber, DPM,2016-04-30 This book is an in depth expose of a system of physics in which the atom is integrated within a more inclusive hybrid building block that combines dark energy and electromagnetic energy together within one system of physics that creates all the matter and the spacetime of our universe The nature and the origin of matter space time gravity inertia kinetic energy and even consciousness are explained from within this hybrid system of physics allowing the large scale and the small scale to be unified within it To understand how the universe started out from an event that created the passage of time and three dimensions of space out of a state where time passage and the three dimensions of space did not previously exist we must first come to understand the nature of other levels of order and dimensions that exist beyond the boundaries of our perceived essence This work explores some of those levels of order and dimensionalities that exist outside of our universe while also revealing how these other dimensionalities take part in creating aspects of our universe as well as of our consciousness that we have not yet come to identify If you ve wondered how it is that the universe functions as it does on the large scale level within the parameters of time and space as to the provisions of special and general relativity while quantum particles have been shown to disobey many of those laws this work will reveal a system of physics that bridges the gap between the large scale and the small scale as well as between time and space which makes sense out of what had previously seemed to be a paradox *Reality* ,1927
