Nuclear Proliferation Today:

Nuclear Proliferation and International Security Sverre Lodgaard, Bremer Maerli, 2007-06-11 The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty

Nuclear Non-Proliferation Michael P. Fry, N. Patrick Keatinge, Joseph Rotblat, 2012-12-06 This volume appears at a time when the prospects for banishing the threat of nuclear annihilation are brighter than at any time since the first atomic device exploded over the desert at Alamogordo The last few years have seen an extraordinary change in the climate of East West relations The programme of political and economic reform which President Gorbachev initiated in the Soviet Union and which is now spreading throughout most of Eastern Europe has been paralleled by serious efforts to reach agreement on measures for conventional and nuclear disarmament This has led to new hope that international peace and security can at last be built upon the firm foundation of justice respect for international law and a determination to approach problems in a spirit of genuine co operation rather than one of distrust and confrontation This new climate encourages us in the belief that the obvious common sense of preventing the further spread of nuclear weapons will come to be shared by all nations At the same time we have to recognize two very disturbing facts which imply that there can be no slackening of our efforts to strengthen the non proliferation regime

The Proliferation Puzzle Zachary S. Davis, Benjamin Frankel, 2020-12-01 Originally published in 1993 this volume was unique in its scope and approach Unlike most literature on nuclear weapons proliferation at the time the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation The proliferation of nuclear weapons is an ideal subject for social science scholarship and such scholarship is especially timely now Among the topics discussed in The Proliferation Puzzle are The building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations Nuclear weapons may be acquired as a hedge against external threat for reasons of national prestige or as a result of pressures by domestic coalitions among scientists bureaucrats and the military They may be sought for defensive purposes or to support hegemonic aspirations Nuclear weapons also raise questions about civilian command and control especially in crisis situations During the last two decades the acquisition of nuclear weapons has been proscribed by the non proliferation regime The decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime and of international regimes more generally Nuclear weapons were introduced at the time bipolarity became the international order As the world moves away from bipolarity there is a need to answer questions such as What would be the effect of nuclear weapons in a multipolar order How will the spread of nuclear weapons affect the distribution of capabilities among states If nuclear weapons spread to additional countries will they enhance stability or exacerbate instability Can the spread of these weapons be managed or controlled This book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread A disciplined rigorous examination of proliferation is important not only for scholarship but also for informed policymaking The purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy The essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific theory informed policy recommendations

Defense White Paper, 1992 **The Current Digest of the Soviet Press**, 1969 **Proceedings of the ... Pugwash Conference on Science and World Affairs**, 1993 *The comparative analysis of the solutions to the problem of nuclear proliferation* Paul Shoust, 2010-12-07 Research Paper undergraduate from the year 2010 in the subject Politics Topic Peace and Conflict Security grade Good European University at St Petersburg course Security and Disarmament in Europe language English abstract The world has not become safer in the 21st century But there is only limited number of really global threats Those include inter alia international terrorism climate change and the issue of nuclear proliferation In its Resolution on the Convention on the Prohibition of Use of Nuclear Weapons the UN General Assembly underlined that the use of nuclear weapons poses the most serious threat to the survival of mankind But despite a nearly universal recognition of

the threat posed by the mere existence of the nuclear arsenals the issue of further nuclear proliferation among the members of the international community is yet to be solved In this paper we attempt to conduct a comparative analysis of possible approaches to the issue of nuclear proliferation The goal of the research however is not the elaboration of practical solution of the issue We will focus on the conceptual value of the one or another option instead The aim is to define main dimensions of the problem that can be faced by the international community be it in the universal fora e g the UN General Assembly or in the exclusive clubs the UN Security Council First part will be dedicated to the theoretical approaches that may be employed in the research Also the framework for the comparative analysis per se will be defined In the second part of the paper we will focus on the determination of factors that should be taken into account during the comparative evaluation of the solutions In the third part the set of factors will be applied to the potential solutions and we will try to define common and specific characteristics of every option There are a lot of competent research papers dedicated to the problem of nuclear proliferation Many of them were published before the end of the Cold War and therefore provide us with the dynamic view on the issue Most of the literature used in the paper is dedicated to the problem of the theoretical and legal dimensions of the nuclear proliferation A number of international documents were used as well the Nonproliferation Treaty the UN General Assembly Resolutions etc Mass media sources proved to be a rich source of information Additional information was derived from the statistical data publications caselaw of the International Court
