Nuclear Weapons and International Law: Existential Risks of Nuclear War and Deterrence through a Legal Lens Charles J. Moxley Jr., 2024-05-15 This two volume book provides a comprehensive analysis of the lawfulness of the use of nuclear weapons based on existing international law established facts as to nuclear weapons and their effects and nuclear weapons policies and plans of the United States Based on detailed analysis of the facts and law Professor Moxley shows that the United States arguments that uses of nuclear weapons including low yield nuclear weapons could be lawful do not withstand analysis Moxley opens by examining established rules of international law governing the use of nuclear weapons first analyzing this body of law based on the United States own statements of the matter and then extending the analysis to include requirements of international law that the United States overlooks in its assessment of the lawfulness of potential nuclear weapons uses He then develops in detail the known facts as to nuclear weapons and their consequences and U S policies and plans concerning such matters He describes the risks of deterrence and the existential nature of the effects of nuclear war on human life and civilization He proceeds to pull it all together applying the law to the facts and demonstrating that known nuclear weapons effects cannot comply with such legal requirements as those of distinction proportionality necessity precaution the corollary requirement of controllability and the law of reprisal Moxley shows that when the United States goes to apply international law to potential nuclear weapons uses it distorts the law as it has itself articulated it overlooks law in such areas as causation risk analysis mens rea and per se rules and disregards known risks as to nuclear weapons effects including radioactive fallout nuclear winter electromagnetic pulses and potential

escalation He then shows that the policy of deterrence is unlawful because the use of such weapons would be unlawful Moxley urges that the United States and other nuclear weapons States take heed of the requirements of international law as to nuclear weapons threat and use He argues that law can be a positive force in society s addressing existential risks posed by nuclear weapons and the policy of nuclear deterrence

Imagining Nuclear War in the British Army, 1945-1989 Simon J. Moody,2019-12-05 The primary mission assigned to the British Army from the 1950s until the end of the Cold War was deterring Soviet aggression in Europe by demonstrating the will and capability to fight with nuclear weapons in defence of NATO territory This surreal mission was unlike any other in history and raised a number of conceptual and practical difficulties This comprehensive study observes how the British Army imagined nuclear war and how it planned to fight it Using new archival sources Simon J Moody analyses British thinking about tactical nuclear weapons the role of the Army within NATO strategy the development of theories of tactical nuclear warfare how nuclear war was taught at the Staff College the role of operational research and the evolution of the Army s nuclear war fighting doctrine He argues that the British Army possessed the intellectual capacity for organisational adaptation but that it displayed a cognitive dissonance about some of the more uncomfortable realities of nuclear war

Wilson,2014 *Nuclear War Hiroshima Nagasaki and A Workable Moral Strategy for Achieving and Preserving World Peace* Raymond G Wilson The real truth of the matter is as you and I know that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson Franklin D Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true thus the financial element in the large centers shares responsibility and blame for the tens if not hundreds of thousands of war deaths in the last two decades The people of the world need protection from those responsible for provoking nations to war In the United States this responsibility lies with all elements in the highest levels of government the decision makers It lies with those who tinker with political and economic machinations most likely for the advantage of a financial element in the large centers These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world This group of people may

include most people serving in the U S Congress and from personal experience many in the U S Military I have my doubts whether Presidents have seen all of the results of the world s first nuclear war they are probably shielded from this Photographs of the victims were confiscated and held confidential for more than 22 years after 1945 There were well more than 210 000 victims not many photographs were made and survived You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war Although the truth from more than 210 000 will never be heard In a future war there would be hundreds of thousands more likely hundreds of millions of victims The United States government has not revealed this kind of truth about its first nuclear war As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki In Chapter 5 a solution is suggested to save us all from our nuclear madness I hate war as only a soldier who has lived it can only as one who has seen its brutality its futility its stupidity Dwight D Eisenhower we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages We have the ability to cultivate self control and consideration for others and to strive to live together in a humane and harmonious manner with others The revival of such true humanity not only between individuals but also between nations is an absolute necessity today for the age has come when one nation s self centered behavior could lead all humanity to annihilation Naomi Shohna 1986 America can do whatever we set our mind to Barack Obama Bulletin of the Atomic Scientists ,1979-05 **War Scare** Peter Pry,1999-09-30 Written by Peter Vincent Pry a former CIA military analyst War Scare provides a history of our country s little known brushes with nuclear war and warns that contrary to popular opinion and the assurances of our political leaders the possibility of a Russian attack still exists BOOK JACKET **The Survival Option** Ivan Tyrrell,1982 Nuclear War and Nuclear Strategy Stephen J. Cimbala,1987-11-13 Teenaged Trace Bonham a star driver on the Midwest super stock circuit blows away the competition wherever he races but with every victory Trace is increasingly aware that his winning is due to more than just his driving skills *The Environmental Effects Of Nuclear War* Julius London,Gilbert F White,2019-07-11 This book assesses the current available information concerning the major scientific problems related to environmental consequences of a possible nuclear war The contributors address a broad range of topics among them the effects of blast heat and local radioactive fallout the likely dispersal patterns and residence times of radioactive debris in the troposphere and stratosphere the probable long term effects on both the local and global biosphere and radiological consequences for humans the effect on the global environment of widespread fires in urban and industrialized regions and the likely significant decrease of stratospheric ozone with a resulting long term increase in harmful UV radiation received at the ground The authors point to problem areas where current information is inadequate or completely lacking and discuss the role of the scientist in developing such information as a contribution to the elimination of the nuclear war threat *Five Days in August* Michael D. Gordin,2015-08-18 Most Americans believe that the Second World War ended because the two atomic bombs dropped on Japan forced it to surrender Five Days in August boldly presents a different interpretation that the military did

not clearly understand the atomic bomb's revolutionary strategic potential that the Allies were almost as stunned by the surrender as the Japanese were by the attack and that not only had experts planned and fully anticipated the need for a third bomb they were skeptical about whether the atomic bomb would work at all With these ideas Michael Gordin reorients the historical and contemporary conversation about the A bomb and World War II Five Days in August explores these and countless other legacies of the atomic bomb in a glaring new light Daring and iconoclastic it will result in far reaching discussions about the significance of the A bomb about World War II and about the moral issues they have spawned The Bomb Fred Kaplan, 2020-01-28 From the author of the classic The Wizards of Armageddon and Pulitzer Prize finalist comes the definitive history of American policy on nuclear war and Presidents actions in nuclear crises from Truman to Trump Fred Kaplan hailed by The New York Times as a rare combination of defense intellectual and pugnacious reporter takes us into the White House Situation Room the Joint Chiefs of Staff's Tank in the Pentagon and the vast chambers of Strategic Command to bring us the untold stories based on exclusive interviews and previously classified documents of how America's presidents and generals have thought about threatened broached and just barely avoided nuclear war from the dawn of the atomic age until today Kaplan's historical research and deep reporting will stand as the permanent record of politics Discussing theories that have dominated nightmare scenarios from Hiroshima and Nagasaki Kaplan presents the unthinkable in terms of mass destruction and demonstrates how the nuclear war reality will not go away regardless of the dire consequences
