Nuclear Proliferation Problems:

The Challenges of Nuclear Non-Proliferation Richard Dean Burns, Philip E. Coyle, 2015-03-12 The Challenges of Nuclear Non Proliferation is an exhaustive survey of the many aspects of non proliferation efforts It explains why some nations pursued nuclear programs while others abandoned them as well as the challenges strengths and weaknesses of non proliferation efforts It addresses key issues such as concerns over rogue states and stateless rogues delivery systems made possible by technology and the connection between nuclear weapons and ballistic missiles examining whether non proliferation regimes can deal with these threats or whether economic or military sanctions need to be developed It also examines the feasibility of eliminating or greatly reducing the number of nuclear weapons A broad survey of one of today s great threats to international security this text provides undergraduates students with the tools needed to evaluate current events and global threats

The Comparative Analysis of the Solutions to the Problem of Nuclear Proliferation Paul Shoust, 2010-12 Research Paper undergraduate from the year 2010 in the subject Politics International Politics Topic Peace and Conflict Studies Security grade Good European University at St Petersburg course Security and Disarmament in Europe language English abstract The world has not become safer in the 21st century But there is only limited number of really global threats Those include inter alia international terrorism climate change and the issue of nuclear proliferation In its Resolution on the Convention on the Prohibition of Use of Nuclear Weapons the UN General Assembly underlined that the use of nuclear weapons poses the most serious threat to the survival of mankind But despite a nearly universal recognition of the threat posed by the mere existence of the nuclear arsenals the issue of further nuclear proliferation among the members of the international community is yet to be solved In this paper we attempt to conduct a comparative analysis of possible approaches to the issue of nuclear proliferation The goal of the research however is not the elaboration of practical solution of the issue We will focus on the conceptual value of the one or another option instead The aim is to define main dimensions of the problem that can be faced by the international community be it in the universal fora e g the UN General Assembly or in the exclusive clubs the UN Security Council First part will be dedicated to the theoretical approaches that may be employed in the research Also the framework for the comparative analysis per se will be defined In the second part of the paper we will focus on the determination of factors that should be taken into account during the comparative evaluation of the solutions In the third part the set of factors will be applied to the potential solutions and we will try to define common and specific characteristics of every option There are a lot of competent research papers dedicated to the pr

Nuclear Proliferation and International Order Olav Njølstad, 2010-09-13 This book examines the state

of the nuclear non proliferation regime and the issues it faces in the early 21st century Despite the fact that most countries in the world have signed the Non Proliferation Treaty NPT there is growing concern that the NPT is in serious trouble and may not be able to stop the further spread of nuclear weapons If so international stability will be undermined with potentially disastrous consequences and the vision of a nuclear weapon free world will become utterly unrealistic More specifically the NPT is exposed to four main challenges explored in this book challenges from outside as three countries that have not signed the Treaty Israel India and Pakistan are known to possess nuclear weapons challenges from within as some countries that have signed on to the Treaty as non nuclear weapons states have nevertheless developed or are suspected to be trying to develop nuclear weapons North Korea and Iran being cases in point challenges from below in the shape of terrorists and other non state actors who may want to acquire radioactive materials or even nuclear weapons and finally challenges from above due to the perceived failure of the five legal nuclear weapons states to keep their part of the double bargain made by the parties of the NPT and take serious steps towards nuclear disarmament This book will be of much interest to students of nuclear proliferation international security war and conflict studies and IR in general

Emel'ia[nov,1982 Nuclear Non-Proliferation Michael P. Fry,1990-06 This volume appears at a time when the prospects for banishing the threat of nuclear annihilation are brighter than at any time since the first atomic device exploded over the desert at Alamogordo The last few years have seen an extraordinary change in the climate of East West relations The programme of political and economic reform which President Gorbachev initiated in the Soviet Union and which is now spreading throughout most of Eastern Europe has been paralleled by serious efforts to reach agreement on measures for conventional and nuclear disarmament This has led to new hope that international peace and security can at last be built upon the firm foundation of justice respect for international law and a determination to approach problems in a spirit of genuine co operation rather than one of distrust and confrontation This new climate encourages us in the belief that the obvious common sense of preventing the further spread of nuclear weapons will come to be shared by all nations At the same time we have to recognize two very disturbing facts which imply that there can be no slackening of our efforts to strengthen the non proliferation regime *Trends in Nuclear Proliferation, 1975-1995* Lewis A.
