The construction time of nuclear power plants have exceeded 13 to 15 years in Northern America and Europe, according to the IPCC.

8 TO 16 YEARS

That's the average construction time of a modern European nuclear power plant - delays not even taken into account.

160 NEW NUCLEAR POWER PLANTS

Would have to be added globally by 2030 if we want to limit global warming to 1.5 degrees.

MORE THAN 9,5 BILLION EUROS

FACT CHECK

Source: Deutsche Welle, Fraunhofer ISE, UBA, DIW, 2021

What about the Small Modular Reactors (SMR)?

SMRs are expected to have lower investment costs and a higher power generation per unit.

However SMRs are not market ready yet, as their prototypes are still being developed. If successful, SMRs can only be market ready in the 2030s.

FACT CHECK

IS NUCLEAR ENERGY SAFE?

31 INCIDENTS SINCE 1952

Due to safety concerns. The average age of French reactors is 35 years old. The older the reactor, the higher the accident risks.

RISKS OF TERROR ATTACKS

Nuclear Politics in America Robert J. Duffy, 1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon com viewed August 24 2020

Disarming the Nuclear Argument Timmon Milne Wallis, 2017-06-23 Nuclear weapons are too important to be left to politicians and generals They need to be discussed in the pub at the school gates and over the kitchen sink so that people are aware of the issues involved and have had the opportunity to think them through TIMMON MILNE WALLIS How much do nuclear weapons actually cost How safe are nuclear weapons even if they are never used Have nuclear weapons kept us safe since the end of World War II Are nuclear weapons legal under International Law The nine nuclear weapon states are extending their commitments to nuclear deterrence well into the second half of this century despite treaty obligations and an unequivocal undertaking to disarm The US alone is expecting to spend up to 1 trillion ie 1 000 000 000 000 upgrading its nuclear weapons over the next 30 years With around 15 000 nuclear weapons stockpiled worldwide the risk of one going off by accident or design is
