Nuclear Madness:

Nuclear Madness: What You Can Do Helen Caldicott, 1994-05-17 As a physician I contend that nuclear technology threatens life on our planet with extinction If present trends continue the air we breathe the food we eat and the water we drink will soon be contaminated with enough radioactive pollutants to pose a potential health hazard far greater than any plague humanity has ever experienced Helen Caldicott First published in 1978 Helen Caldicott's *cri du coeur* about the dangers of nuclear power became an instant classic In the intervening sixteen years much has changed the Cold War is over nuclear arms production has decreased and there has been a marked growth in environmental awareness But the nuclear genie has not been forced back into the bottle The disaster at Chernobyl and the incidents at other plants around the world have disproven the image of safe nuclear power Nuclear waste dumping has further poisoned our environment and developing nuclear technology in the Third World poses still further risks In this completely revised updated and expanded edition Dr Caldicott defines for the 1990s the dangers of this madness including the insidious influence of the nuclear power industry and the American government's complicity in medical experiments using nuclear material and calls on us to accept the moral challenge to fight against it both for our own sake and for that of future generations *Nuclear Madness* Ira Chernus, 1991-01-01 This book builds on Robert Jay Lifton's theory of psychic numbing and takes madness as a guiding metaphor It shows that public perceptions of the Bomb are a kaleidoscope of ever changing ideas and images Recent changes in public awareness only signal new symptoms of this public madness symptoms unwittingly fostered by the antinuclear movement Since the newest nuclear images follow the same psychological pattern as their predecessors they are likely to lead us deeper into nuclear madness Chernus offers new interpretations of four major theorists into the psychology of religion Paul Tillich R D Laing Mircea Eliade and James Hillman to trace the roots of nuclear madness back to the onset of modernity when the West gained technological mastery at the price of losing religious imagination and ontological security The author develops an interpretation of Lifton's own thought as an ontological and religious psychology Drawing on the work of Eliade and Hillman he goes on to suggest that madness reflects a repressed desire to transform life by opening up the floodgates of imagination A conscious cultivation of the play of imagination can lead the way through madness to sanity and peace But imagination can only respond to the nuclear threat if it is acted out in a new brand of peace activism that blends pragmatic politics with psychological and religious transformation **Nuclear Madness** Helen Caldicott, Nancy Herrington, Nahum Stiskin, Menahem Nahum Stiskin, 1980 First published in 1978 Helen Caldicott's *cri du coeur* about the dangers of nuclear power became an instant classic In the intervening sixteen years much has changed the Cold War is over nuclear arms production has decreased and there has been a marked growth in environmental awareness But the nuclear genie has not been forced back into the bottle The disaster at Chernobyl and the incidents at other plants around the world have disproven the image of safe nuclear power Nuclear waste dumping has further poisoned our environment and

developing nuclear technology in the Third World poses still further risks In this completely revised updated and expanded edition Dr Caldicott defines for the 1990s the dangers of this madness including the insidious influence of the nuclear power industry and the American government s complicity in medical experiments using nuclear material and calls on us to accept the moral challenge to fight against it both for our own sake and for that of future generations **Nuclear Madness** Helen Caldicott,Nancy Herrington,Nahum Stiskin,1978 *Curing Nuclear Madness* Frank G. Rocket Man John Gartner,Steven Buser,Leonard Cruz,2018-06-09 Will President Trump destroy civilization or win the Nobel Peace Prize Humankind s survival feels like a jump ball that could go either way We are perched on a precipice and the reason we are looking into an abyss of nuclear annihilation is that the American president has unencumbered unilateral control over the nuclear codes One thing we know for sure is that the mind of Donald Trump is currently in control of our fate Never before have the nuclear codes been in the hands of a man who many observers view as unstable and erratic The twenty four experts who contributed to this book analyze President Trump s behavior hoping to provide insights into what may be the most urgent question of our time What will Trump do with his big button Table of Contents Chapter 1 The Erratic President Harry Segal PhD Cornell University Chapter 2 Nuclear Risk is Rising as Donald Trump Goes Downhill John Gartner PhD Founder Duty To Warn Chapter 3 If President Trump Were Airman Trump I Would Not Certify Him Psychologically Fit to Handle Nuclear Weapons Steven Buser MD Psychiatrist Former Major USAF Chapter 4 If Trump Were a Policeman I Would Have to Take Away His Gun David Reiss MD Chapter 5 If Trump Was Entering the Military He Would Not Receive a Security Clearance William Enyart Former U S Congressman Retired General Chapter 6 A Man with No Humanity Has the Power to Destroy Mankind Lance Dodes MD Chapter 7 Trump s Sick Psyche and Nuclear Weapons A Deadly Mixture Gordon Humphrey former Republican Senator Chapter 8 Facing the Truth The Power of a Predatory Narcissist Jacqueline West PhD Chapter 9 Trump s No Madman He s Following the Strongman Playbook Ruth Ben Ghiat Dept of History NYU Chapter 10 The

Popular Will Versus Nuclear Madness Movement for a Democracy of Content (London),1961 From MAD to Madness Dr. Paul H. Johnstone,Diana Johnstone, Ph.D.,2016-12-26 This deathbed memoir by Dr Paul H Johnstone former senior analyst in the Strategic Weapons Evaluation Group WSEG in the Pentagon and a co author of The Pentagon Papers provides an authoritative analysis of the implications of nuclear war that remain insurmountable today Indeed such research has been kept largely secret with the intention not to alarm the public about what was being cooked up This is the story of how U S strategic planners in the 1950s and 1960s worked their way to the conclusion that nuclear war was unthinkable It drives home these key understandings That whichever way you look at it and this book shows the many ways analysts tried to skirt the problem nuclear war means mutual destruction That Pentagon planners could accept the possibility of totally destroying another nation while taking massive destructive losses ourselves and still conclude that we would prevail That the supposedly scientific answers provided to a wide range of unanswerable questions are of highly dubious standing That official spheres neglect anything near a comparable effort to understand the enemy point of view rather than to annihilate him or to use such understanding to make peace Dr Johnstone s memoirs of twenty years in the Pentagon tell that story succinctly coolly and objectively He largely lets the facts speak for themselves while commenting on the influence of the Cold War spirit of the times and its influence on decision makers Johnstone writes Theorizing about nuclear war was a sort of virtuoso exercise in creating an imaginary world wherein all statements must be consistent with each other but nothing need be consistent with reality because there was no reality to be checked against While remaining highly secret so much so that Dr Johnstone himself was denied access to what he had written these studies had a major impact on official policy They

contributed to a shift from the notion that the United States could inflict massive retaliation on its Soviet enemy to recognition that a nuclear exchange would bring about Mutual Assured Destruction MAD From MAD to Madness could not be more timely reading In it a former senior Pentagon analyst from the last Cold War comes back from the past to warn us of the disaster we are courting in the new Cold War We should heed his warning Ron Paul **On Walking Together Away from the Brink** Ram Dass, Daniel Ellsberg, 1982 **Pilgrimage**, 1983 *Nuclear Madness Film Festival* Chicago Filmmakers, **New World Review**, 1963 **Win**, 1982
