Environmental Management of the Media Pietari Kääpä, 2018-05-23 In recent years the widely held misconception of the media as an ephemeral industry has been challenged by research on the industry's significant material footprint Despite this material turn no systematic study of this sector has been conducted in ways that considers the role of the media industries as consumers and users of a range of natural resources Filling this gap *Environmental Management of the Media* discusses the environmental management of the media industries in the UK and the Nordic countries These Nordic countries both as a set of small nations and as a regional constellation are frequently perceived as some of the greenest in the world yet not only is the footprint of the media industries practically ignored in academic research but the very real stakes of the industries global impact are not comprehensively understood Here the author focuses on four key areas for investigating the material impact of Nordic media 1 resources used for production and dissemination 2 regulation of the media 3 organizational management and 4 labour practices By adopting an interdisciplinary perspective that combines ecocritical analysis with interrogation of the political economy of the creative industries K p argues that taking the industries to task on their environmental footprint is a multilevel resource and organizational management issue that must be addressed more effectively in contemporary media studies This book will be of great interest to students and scholars of media

Risk-Based Environmental Decisions Douglas J. Crawford-Brown, 2012-12-06 Risk Based Environmental Decision Methods and Culture presents the principles of human health risk analysis as they are applied in environmental decisions It balances the discussion of scientific theory and methods philosophical analysis and applications in regulatory decisions The material is directed towards risk analysts who must apply their skills in a policy setting and towards policy analysts who must

use risk estimates The presentation is suited ideally as an introductory text on the methods of risk analysis and on the cultural issues that underlie these methodologies An important feature of Risk Based Environmental Decision Methods and Culture is that it is designed around a series of detailed case studies of environmental risk analysis which walk the reader from the historical nature of the problem to the formulation as a risk based problem to the conduct of risk analysis and on to the application debate and defense of the risk analysis *Risk Methodologies for Technological Legacies* Dennis Bley, Vitaly A. Eremenko, 2012-12-06 The Cold War Era left the major participants the United States and the former Soviet Union FSU with large legacies in terms of both contamination and potential accidents Facility contamination and environmental degradation as well as the accident vulnerable facilities and equipment are a result of weapons development testing and production Although the countries face similar issues from similar activities important differences in waste management practices make the potential environmental and health risks of more immediate concern in the FSU and Eastern Europe In the West most nuclear and chemical waste is stored in known contained locations while in the East much of the equivalent material is unconfined contaminating the environment In the past decade the U S started to address and remediate these Cold War legacies Costs have been very high and the projected cost estimates for total cleanup are still increasing Currently in Russia the resources for starting such major activities continue to be unavailable Environment & Planning ,2005
