American Chess Bulletin Hartwig Cassell, Hermann Helms, 1924     Vanity Fair , 1927     **Heating, Ventilating and Sanitary Plumbing** , 1902     **Schooling New Media** Tyler Bickford, 2017

Popular music and digital media are constantly entwined in elementary and middle school children's talk interactions and relationships and offer powerful cultural resources to children in their everyday struggles over institutionalized language literacy and expression in school

In *Schooling New Media* author Tyler Bickford considers how digital music technologies are incorporated into children's expressive culture their friendships and their negotiations with adults about the place of language music and media in school

*Schooling New Media* is a groundbreaking study of children's music and media consumption practices examining how transformations in music technologies influence the way children their peers and adults relate to one another

Based on long term ethnographic research with a community of schoolchildren in Vermont Bickford focuses on portable digital music devices i e MP3 players to reveal their key role in mediating intimate face to face relationships and structuring children's interactions both with music and with each other

*Schooling New Media* provides an important ethnographic and theoretical intervention into ethnomusicology childhood studies and music education emphasizing the importance and yet under appreciation of interpersonal interactions and institutions like schools as sites of musical activity

Bickford explores how headphones facilitate these school centered interactions as groups of children share their earbuds with friends and listen to music together while participating in the dense overlap of talk touch and gesture of their peer groups

He argues that children treat MP3 players more like toys than technology and that these devices expand the repertoires of childhood communicative practices such as passing notes and whispering all means of interacting with friends beyond the reach of adults

These connections afforded by digital music listening enable children to directly challenge the language and literacy goals of classroom teachers

Bickford's *Schooling New Media* is unique in its intensive ethnographic attention to everyday sites of musical consumption and performance and offers a sophisticated conceptual approach for understanding the problems and possibilities of children's uses of new media in schools
