Wang,Ronglan L. Xu,2002-11-20 The COSPAR Colloquium on Solar Terrestrial Magnetic Activity and Space Environment STMASE was held in the National Astronomy Observatories of Chinese Academy of Sciences NAOC in Beijing China in September 10 12 2001 The meeting was focused on five areas of the solar terrestrial magnetic activity and space environment studies including study on solar surface magnetism solar magnetic activity dynamical response of the heliosphere space weather prediction and space environment exploration and monitoring A hot topic of space research CMEs which are widely believed to be the most important phenomenon of the space environment is discussed in many papers Other

papers show results of observational and theoretical studies toward better understanding of the complicated image of the magnetic coupling between the Sun and the Earth although little is still known little its physical background Space weather prediction which is very important for a modern society expanding into out space is another hot topic of space research However a long way is still to go to predict exactly when and where a disaster will happen in the space In that sense there is much to do for space environment exploration and monitoring The manuscripts submitted to this Monograph are divided into the following parts 1 solar surface magnetism 2 solar magnetic activity 3 dynamical response of the heliosphere 4 space environment exploration and monitoring and 5 space weather prediction Papers presented in this meeting but not submitted to this Monograph are listed by title as unpublished papers at the end of this book

**The Thematic Evolution of Sports Journalism's Narrative of Mental Illness** Ronald Bishop,2023-03-24 In *The Thematic Evolution of Sports Journalism's Narrative of Mental Illness* A Little Less Conversation Ronald Bishop contends that the conversation developed and sustained by sports journalists about professional athletes experience with mental illness has evolved through three slightly overlapping stages each marked by a primary theme During the first stage from the end of the 19th Century to the middle of the 20th century sports journalists sensationalized the experience and portrayed the athletes breathlessly labeled insane as tragic figures During the roughly two decade second stage an athlete s experience with mental illness was portrayed as an inconvenience that flummoxed and infuriated team officials who had neither the ability nor the inclination to address the issue The final stage leading up to present day and beyond is most notable for the development and widespread adoption of a coverage template that centers around an athlete s brave decision to reveal and discuss their experiences Combining historical research and narrative analysis Bishop interrogates whether sports journalists have finally begun to cover the experience of mental illness with sufficient depth Scholars of media studies journalism celebrity studies and sports psychology will find this book of particular interest
