Statistical and Probabilistic Models in Reliability Nikolaos Limnios, Dumitru Cezar Ionescu, 2012-12-06 This volume consists of twenty four papers selected by the editors from the sixty one papers presented at the 1st International Conference on Mathematical Methods in Reliability held at the Politehnica University of Bucharest from 16 to 19 September 1997 The papers have been divided into three sections statistical methods probabilistic methods and special techniques and applications Of course as with any classification some papers could be as well assigned to other sections Problems in reliability are encountered in items in everyday usage Reliability is an important feature of household appliances cars telephones power supplies and so on whether viewed from the vantage of the producer or the consumer Important decisions are based on the reliability of the product Obtaining systems that perform adequately for a specified period of time in a given environment is an important goal for both government and industry Hence study and use of reliability theory which can be applied in the research development and production phases of a system to enable the user to evaluate and improve performance is a worthwhile venture If reliability theory is to be useful it must be quantitative in nature because reliability must be demonstrable Subsequently probability and statistics among others play an important part in its development

Proceedings of the 4th International Symposium on New Energy and Electrical Technology Fushuan Wen, Ishak Bin Aris, 2024-09-23 The book brings together leading experts in the field of energy science and technology to share cutting edge research and advancements in areas such as renewable energy sources smart grid technology and power management solutions Through these contributions readers will gain valuable insights into the future of energy technology and be inspired to further their own research in pursuit of sustainable energy solutions This book serves as a valuable resource for scholars engineers and professionals looking to stay informed on the latest developments in the field **6th Conference on**
