What Is the Role for Effective Pedagogy In Contemporary Higher Education? Carl Senior, Dilly Fung, Christopher Howard, Rowena Senior, 2018-10-05 The number of students entering into Higher Education HE continues to grow and as such the sector now stands at the threshold of a major shift in its philosophy No longer does the academic prerogative belong to a generation who valued learning for the sake of enlightenment Many contemporary undergraduate students enter their programmes of study with a primary desire to improve their position on the subsequent employability market Universities have been quick to meet this need and institutional offerings have followed suit enabling students to gain experience in a range of additional and subsidiary programmes that focus on the provision of value added benefits Here students are encouraged to develop expertise in a range of topics from entrepreneurship and enterprise to intellectual property and even leadership skills The first round of casualties that fall victim to such a shift are those programmes of study embedded within the humanities As is evidenced by the falling numbers of enrolling students the incoming cohort is less likely now to engage with such programmes while participation in programmes that have a clear employability component has never been so high To ensure that the HE sector continues to enable graduates to become effective citizens who contribute to the betterment of society a range of general questions need to be addressed What does it mean to be an authentic university in the modern era What are the real student expectations of HE and how are education providers framing and meeting these expectations Is a new breed of academic leadership needed that will both meet the expectations of the students and guide the aspirations of academic staff Finally do we need an opportunity to reflect on the effective design and delivery of curriculum Should the undergraduate student body play more of a role in the design of the curriculum or should they remain the recipients of a programme that has been designed by subject specialists The scope of this book is wide but it brings the design and delivery of higher education programmes under the empirical gaze of educational psychology That is to say all chapters centre on the impact of higher educational programmes on the student teacher relationship student learning achievement and identity It is therefore crucial to explore the psychological impact of higher education institutions and how these can then be used to inform innovative educational practice and policy

**Facility Management Practices** Solomon Pelumi Akinbogun, Clinton Oluwaseun Akinbogun, 2024-10-30 This book explores the management of public facilities and the wider issues around it with examples from educational health facilities and public spaces Human activities in every economy are require facilities that must be effectively managed for optimal performance Facility management in the public and private sector in developing countries requires close examination to explain the reasons for things go wrong From the economist s point of view some facilities are better provided by public sector to maintain inclusivity and protect the social welfare of vulnerable people For example in Nigeria a good number of public facilities such as schools and health facilities are under

performing because of poor and ineffective management This provides an opportunity for the private sector However a majority of the population remains deprived of access because of lack of affordability The research in this book was carried out to assess what could be done to ensure that essential services are not left entirely in the private sector and scope out possible synergies between the public and private The book is useful to policy makers at all levels of the public and private sectors
