The Psychology and Science of Pseudoscience Terence Hines, 2025-03-12 Excellent up to date book about pseudoscience and science denial with an in depth look at how human psychology promotes these problems. An engaging and comprehensive critical review of a wide range of pseudoscientific topics which explores the underlying psychological factors behind paranormal and related beliefs.

God's Journey Brett Rogers, 2012-10 God's journey starts by laying a conceptual foundation of creation and then discusses the steps it has taken in its evolution. There is only one fundamental pattern: creation finds a way of getting its parts to work together to create something that is more capable of observing and acting within creation ideally in a sustainable way. Good examples of this are the trillions of cells that work together to create a human being and humans who work together to create schools, businesses, governments and economies. Humans like other parts of creation can express this fundamental pattern to varying degrees of effectiveness. Sometimes we work together to create something that contributes to the evolution of creation really well, sometimes not so well, and sometimes it takes away from it. Learning to optimize our potential to contribute to our personal and collective evolution is the focus of this book. I will discuss a progressive approach for enhancing our personal health and performance to enjoy and use as a foundation for enhancing our collective health and performance. Evolution, Enlightenment is the most important process for both our personal and collective evolution. The more aware we are, the easier it is to make good decisions on how to act. Academic pursuits are very important in this, but so is developing our psychic abilities such as intuition. There is much more to this.
