<https://lilinmanissatu.blogspot.com/?read=B07D3VR9HB> | PDF_ Psychoanalysis: Evolution and Development | Clara Thompson was a leading representative of the cultural interpersonal school of psychoanalysis, sometimes known as the "neo-Freudians," which included Karen Horney, Erich Fromm, and Harry Stack Sullivan. "Classical analysts" once viewed neo-Freudians with the greatest suspicion and mistrust, yet today they can be seen for the innovative group of thinkers they were. Thompson's *Psychoanalysis: Evolution and Development*, first published in 1950, remains an enormously fair-minded discussion of the history of psychoanalytic theory and therapy. Psychoanalysis has always been a theory of personality as well as a technique of therapy. Since Freud was born in 1856, and was an outstanding representative of the culture of old Vienna, Thompson thought there was plenty of room for revising classical analytic thinking in light of later developments. Such revisionism, she believed, need not lose the essential appreciation of the dynamic unconscious within classical analysis. However, Thompson felt Freud's biological outlook needed to be supplemented by a culturally more sophisticated orientation, and she was among those who tried to put Freud's concepts of libido into historical perspective. Instead of psychoanalysis having as its objective the release of tensions, Thompson proposed that the goal of analysis ought to be the growth of the total personality. Her revisionism also meant that the scope of psychoanalytic treatment could be broadened well beyond the neuroses Freud sought to explain. Thompson well understood the impact of the social environment on character formation. The psychology of women needed to be rethought; differences between men and women could be partly explained by the social expectations that traditional Western culture had imposed on them. Thompson believed the whole analyst-patient relationship needed to be rethought; the real personality of the therapist has to be acknowledged, and the full human interplay between patient and analyst required examination. In the current positivistic therapeutic climate based on technological advances in psychopharmacology, the ethical and humanistic dimension may be lost. Reflecting on the work of Clara Thompson and the neo-Freudian school can remind us of earlier efforts to challenge therapeutic authority and their distinct relevance to our problems today.

Race in Psychoanalysis Celia Brickman,2017-12-06 Race in Psychoanalysis analyzes the often unrecognized racism in psychoanalysis by examining how the colonialist discourse of late nineteenth century anthropology made its way into Freud s foundational texts where it has remained and continues to exert a hidden influence Recent racial violence particularly in the US has made many realize that academic and professional disciplines as well as social and political institutions need to be re examined for the racial biases they may contain Psychoanalysis is no exception When Freud applied his insights to the history of the psyche and of civilization he made liberal use of the anthropology of his time which was steeped in colonial racist thought Although it has often been assumed that this usage was confined to his non clinical works this book argues that through the pivotal concept of primitivity it fed back into his theories of the psyche and of clinical technique as well Celia Brickman examines how the discourse concerning the presumed primitivity of colonized and enslaved peoples contributed to psychoanalytic understandings of self and raced other She shows how psychoanalytic constructions of race and gender are related and how Freud s attitudes towards primitivity were related to the anti Semitism of his time All of this is demonstrated to be part of the modernist aim of psychoanalysis which seeks to create a modern subjectivity through a renegotiation of the past Finally the book shows how all of this can affect both clinician and patient within the contemporary clinical encounter Race in Psychoanalysis is a pivotal work of significance for scholars practitioners and students of psychoanalysis psychologists clinical social workers and other clinicians whose work is informed by psychoanalytic insights as well as those engaged in critical race and postcolonial studies

A Neuro-Psychoanalytical Dialogue for Bridging Freud and the Neurosciences Sigrid Weigel, Gerhard Scharbert,2015-08-03 The book presents an overview of the term neuropsychoanalysis and traces its historical and scientific foundations as well as its cultural implications It also turns its attention to some blind spots open questions and to what the future may hold It examines the cooperative and conflicted relationship between psychoanalysis and neuroscience Articles from different fields investigate the neurological basis of psychoanalysis as well as the psychological terms of neurology They also discuss what psychoanalysis has to offer neuroscience In addition the emerging neuro psychoanalytical dialogue is enriched here by the voice of a culturally informed history of science The book brings leading authorities on these topics into

conversation with each other creating an unprecedented opportunity to better understand the language of the psyche Specific concerns include the discussion of corporeality how the body figures into psychoanalysis the meaning of the unconscious in connection with dreams unconscious fantasies and the field of epigenetics Following a historical perspective the book provides a re reading of Freud s drive theory exploring his concept of life at the threshold of science and culture as well as the relationship between various representations somatic states and the origin of drive Overall the book argues that if the different methodological approaches of psychoanalysis and neuroscience are acknowledged not only for their individual uniqueness but also as a dialectic then the resulting epistemological and methodological dialogue might open up a fascinating body of neuropsychanalytical knowledge
