<https://lilinmanissatu.blogspot.com/?read=B07D3VR9HB> | PDF\_ Psychoanalysis: Evolution and Development | Clara Thompson was a leading representative of the cultural interpersonal school of psychoanalysis, sometimes known as the "neo-Freudians," which included Karen Horney, Erich Fromm, and Harry Stack Sullivan. "Classical analysts" once viewed neo-Freudians with the greatest suspicion and mistrust, yet today they can be seen for the innovative group of thinkers they were. Thompson's *Psychoanalysis: Evolution and Development*, first published in 1950, remains an enormously fair-minded discussion of the history of psychoanalytic theory and therapy. Psychoanalysis has always been a theory of personality as well as a technique of therapy. Since Freud was born in 1856, and was an outstanding representative of the culture of old Vienna, Thompson thought there was plenty of room for revising classical analytic thinking in light of later developments. Such revisionism, she believed, need not lose the essential appreciation of the dynamic unconscious within classical analysis. However, Thompson felt Freud's biological outlook needed to be supplemented by a culturally more sophisticated orientation, and she was among those who tried to put Freud's concepts of libido into historical perspective. Instead of psychoanalysis having as its objective the release of tensions, Thompson proposed that the goal of analysis ought to be the growth of the total personality. Her revisionism also meant that the scope of psychoanalytic treatment could be broadened well beyond the neuroses Freud sought to explain. Thompson well understood the impact of the social environment on character formation. The psychology of women needed to be rethought; differences between men and women could be partly explained by the social expectations that traditional Western culture had imposed on them. Thompson believed the whole analyst-patient relationship needed to be rethought; the real personality of the therapist has to be acknowledged, and the full human interplay between patient and analyst required examination. In the current positivistic therapeutic climate based on technological advances in psychopharmacology, the ethical and humanistic dimension may be lost. Reflecting on the work of Clara Thompson and the neo-Freudian school can remind us of earlier efforts to challenge therapeutic authority and their distinct relevance to our problems today.

Stern,Irwin Hirsch,2017-12-14 Further Developments in Interpersonal Psychoanalysis 1980s 2010s is the second collection of selected classic articles of the modern era by psychoanalysts identified with the interpersonal perspective The first The Interpersonal Perspective in Psychoanalysis 1960s 1990s presented articles by second and third generation interpersonalists This book contains those written by the third and fourth generation of interpersonal psychoanalysts The articles selected by the Editors for this second book extend the theme of transference and countertransference that was the throughline of the first book lending even greater significance in clinical practice to the analyst s subjectivity and its relation to the patient s mind One chapter after another in this book reveal ways that the analyst s experience can lead to a greater appreciation of the patient s unconscious experience It is because of papers such as these that interpersonal psychoanalysis has been described as the origin at least in North America of the contemporary clinical interest in psychoanalytic subjectivity As in the first the articles in this second book include classic contributions from Bromberg Greenberg Hirsch Mitchell Levenson Stern and Wolstein these writers are joined here by Blechner Bonovitz Buechler Fiscalini Held Weiss Kuriloff and White North American psychoanalysis has long been deeply influenced and substantially changed by clinical and theoretical perspectives first introduced by interpersonal psychoanalysis Yet even today despite its origin in the 1930s many otherwise well read psychoanalysts and psychotherapists are not well informed about the field Along with its companion work this book provides a superb starting point for those who are not as familiar with interpersonal psychoanalysis as they might be For those who already know the literature the book will be useful in placing a selection of classic interpersonal articles and their writers in key historical context **The Evolution of a Theoretical Revolution** Mimi G. coherence as well as his conceptual logic and personal directions concerning his evolving views of the reciprocal interactions between mind and body the motivational force of instinctual drives and the dominant role of sexuality rooted in evolutionary biology in human development behaviour and the creation of neurotic disturbances We follow Freud's construction and sequential reconstructions of his theoretical models concerning the nature dynamics and principles of unconscious mental functioning including his changing concepts on the nature and purpose of dreams We trace his changing views on the role of deferred action of early childhood experiences and the determining role of unconscious fantasy psychic reality in the formation of adult character structure and neuroses Through such historical analysis this book provides grounding for a meaningful understanding of Freud's familiar concepts id ego superego and the Oedipus complex We explore what these concepts meant to Freud why he conceived them and what functions they served in his theory of mind This is the perfect book for students and trainees wanting to learn more about the development of Freud's ideas as well as for established psychoanalysts and psychotherapists interested in expanding their knowledge of Freud's theories

unconscious in connection with dreams unconscious fantasies and the field of epigenetics Following a historical perspective the book provides a re reading of Freud s drive theory exploring his concept of life at the threshold of science and culture as well as the relationship between various representations somatic states and the origin of drive Overall the book argues that if the different methodological approaches of psychoanalysis and neuroscience are acknowledged not only for their individual uniqueness but also as a dialectic then the resulting epistemological and methodological dialogue might open up a fascinating body of neuropsychanalytical knowledge
