Human Memory Gabriel A. Radvansky, 2015-08-20 Provides students with a guide to human memory its properties theories about how it works and how studying it can help us understand who we are and why we do the things that we do For undergraduate and graduate courses in Human Memory This book provides a very broad range of topics covering more territory than most books In addition to some coverage of basic issues of human memory and cognition that are of interest to researchers in the field the chapters

also cover issues that will be relevant to students with a range of interests including those students interested in clinical social and developmental psychology as well as those planning on going on to medical and law schools The writing is aimed at talking directly to students as opposed to talking down to them in a clear and effective manner Not too dense but also not too conversational as well This 2nd edition includes a series of exercises that allow the student to try out the concepts and principles conveyed in the chapters or to use as the basis for exploring their own ideas Introduction to Human Memory

Michael J. A. Howe,1970 **Human Memory** Ian Neath,1998 In this up to date book author Ian Neath offers readers an exploration of the wonders of accumulated knowledge With an emphasis on theory and models as well as on research Neath maintains an ideal balance between historically significant findings and current state of the art research He illustrates the process of designing and conducting diagnostic research and in the process gives readers an appreciation of experimental design The various theories of memory are introduced with an examination of how each has been developed and evaluated

Human Memory Mary B. Howes,2006-11-22 *Human Memory Structures and Images* offers students a comprehensive overview of research in human memory Providing a theoretical background for the research author Mary B Howes uses a clear and accessible format to cover three major areas mainstream experimental research naturalistic research and work in the domains of the amnesias malfunctions of memory and neuroscience **Human Memory** Michael W. Eysenck,1977

Remembering D. Stephen Lindsay,Colleen M. Kelley,Andrew P. Yonelinas,Henry L. Roediger, III,2014-11-13 In the 22 chapters in this volume many of the world s foremost memory scientists report on their cutting edge research on the nature of human memory with several chapters reporting new empirical studies that are being published for the first time All the contributions are inspired by the work of Larry Jacoby on human memory with his emphasis on episodic memory that is the processes and mechanisms that enable us to remember our own past experiences In addition the volume reflects Jacoby s appreciation that memory enters into a wide range of psychological phenomena including perceiving attending and performing The stellar list of contributors and the breadth of coverage makes this volume essential reading for researchers and graduate students in cognitive psychology and cognitive neuroscience as well as being a tribute and celebration of the inspirational groundbreaking and ongoing work of Larry Jacoby **Human Memory** Geoffrey R. Loftus,Elizabeth F.

Loftus,1976 First Published in 1976 Routledge is an imprint of Taylor Francis an informa company Human Memory Ian Neath,Aimée M. Surprenant,2003 After a historical overview this text emphasizes the relationships among research data and theory in the field of memory and covers areas including sensory memory amnesia and memory development Foundations of Human Memory Michael Jacob Kahana,2014-05-01 *Foundations of Human Memory* provides an introduction to the scientific study of human memory with an emphasis on both the major theories of memory and the laboratory studies that have been used to test those theories and inspire their further development Written with the undergraduate student in mind the text assumes no specific background in the subject but a general familiarity with scientific method and quantitative

approaches to the treatment of data Foundations of human memory is organized around the major empirical paradigms used to study memory in the laboratory and the theories used to explain data obtained using those paradigms The text begins with a focus on memory for individual items building up to memory for associations between items and finally to memory for entire sequences of items and the problem of memory search Several major theories of memory are considered in detail including strength theory summed similarity theory neural network based theories retrieved context theory and theories based on the division of memory into separate short term and long term storage systems The text emphasizes basic research over applied problems but brings in real world examples and neuroscientific evidence as appropriate

Models of Human Memory Donald A. Norman, 2013-10-22 Models of Human Memory provides an overview of the state of knowledge on human memory models The book begins with an introductory chapter on the basic stages of the memory system and the historical roots of memory models The remaining chapters are organized into five parts Part I on memory systems covers topics such as a system for perception and memory multi trace strength theory of memory and a model for postperceptual verbal memory that postulates a single memory store with multiple copies called replicas created in memory by rehearsal processes Part II presents studies phoneme storage and word recognition Part III on memory for associations examines the storage retrieval theory for the memorizing processes and presents simple model of short term memory STM for paired associates Part IV on storage and retrieval mechanisms deals with mechanisms of repetition and rehearsal in short term memory models of recall and recognition and memory search models Part V presents a theory of human long term associative memory and examines conceptual and methodological interactions between information processing investigations of cognitive activity and attempts to build models of memory
