Sherman, Otfried Spreen, 2006-04-06 For the practicing neuropsychologist or researcher keeping up with the sheer number of newly published or updated tests is a challenge as is evaluating the utility and psychometric properties of neuropsychological tests in a clinical context The goal of the third edition of *A Compendium of Neuropsychological Tests* a well established neuropsychology reference text is twofold First the Compendium is intended to serve as a guidebook that provides a comprehensive overview of the essential aspects of neuropsychological assessment practice Second it is intended as a comprehensive sourcebook of critical reviews of major neuropsychological assessment tools for the use by practicing clinicians and researchers Written in a comprehensive easy to read reference format and based on exhaustive review of research literature in neuropsychology neurology psychology and related disciplines the book covers topics such as basic aspects of neuropsychological assessment as well as the theoretical background norms and the utility reliability and validity of neuropsychological tests For this third edition all chapters have been extensively revised and updated The text has been considerably expanded to provide a comprehensive yet practical overview of the state of the field Two new chapters have been added Psychometrics in Neuropsychological Assessment and Norms in Psychological Assessment The first two chapters present basic psychometric concepts and principles Chapters three and four consider practical aspects of the history taking interview and the assessment process itself Chapter five provides guidelines on report writing and chapters six through sixteen consist of detailed critical reviews of neuropsychological tests and address the topics of intelligence achievement executive function attention memory language visual perception somatosensory olfactory function mood personality and response bias A unique feature is the inclusion of tables that summarize salient features of tests within each domain so that readers can easily compare measures Additional

tables within each test review summarize important features of each test highlight aspects of each normative dataset and provide an overview of psychometric properties Of interest to neuropsychologists neurologists psychiatrists and educational and clinical psychologists working with adults as well as pediatric populations this volume will aid practitioners in selecting appropriate testing measures for their patients and will provide them with the knowledge needed to make empirically supported interpretations of test results

Methods and Morals in the Life Sciences Wim J. van der Steen, Vincent K.Y. Ho, 2001-04-30 Most researchers would be amazed to discover that opinions they have about cherished themes in biology and medicine are biased Van der Steen and Ho contend that logic and methodology are not well applied in biology and medicine arguing that the impact of social and moral factors on claims within these two disciplines is underestimated In response to this situation Van der Steen and Ho present tools from logic and ethics for assessing existing literature These tools will help to create sound articles and materials in the life sciences After reviewing logic and methodological approaches broad guidelines are used to place science in a social context Examples from life sciences illustrate the implementation of logic methodology and guidelines in forty five brief case studies Each study includes comments on quoted and paraphrased passages from a single article or book Cross references facilitate the assimilation of lessons from the text Students researchers and scholars in biology biomedicine philosophy and ethics as applied to the life sciences will find this guide useful in improving their research and writing skills
