**Dealing with Dysfunction** Jorrit de Jong,2016-09-13 How can we intervene in the systemic bureaucratic dysfunction that beleaguers the public sector De Jong examines the roots of this dysfunction and presents a novel approach to solving it Drawing from academic literature on bureaucracy and problem solving in the public sector and the clinical work of the Kafka Brigade a social enterprise based in the Netherlands dedicated to diagnosing and remedying bureaucratic dysfunction in practice this study reveals the shortcomings of conventional approaches to bureaucratic reform The usual methods have failed to diagnose problems distinguish symptoms or identify root causes in a comprehensive or satisfactory way They have also failed to engage clients professionals and midlevel managers in understanding and addressing the dysfunction that plagues them This book offers conceptual frameworks theoretical insights and practical lessons for dealing with the problem It sets a course for rigorous public problem solving to create governments that can be more effective efficient equitable and responsive to social concerns De Jong argues that successfully remedying bureaucratic dysfunction depends on employing diagnostics capable of distinguishing and dissecting various kinds of dysfunction The Anna Karenina principle applies here all well functioning bureaucracies are alike every dysfunctional bureaucracy is dysfunctional in its own way The author also asserts that the worst dysfunction occurs when multiple organizations share responsibility for a problem but no single

organization is primarily responsible for solving it This points to a need for creating and reinforcing distributed problem solving capacity focused on deep cross organizational learning and revised accountability structures Our best approach to dealing with dysfunction may therefore not be top down regulatory reform but rather relentless bottom up and cross boundary leadership and innovation Using fourteen clinical cases of bureaucratic dysfunction investigated by the Kafka Brigade the author demonstrates how a proper process for identifying defining diagnosing and remedying the problem can produce better outcomes *Flight*, 1909 **Nickel on the Grass** Phil Handley, Philip "Hand Handley Colonel Usaf (Ret), 2006 Nickel On The Grass is a series of vignettes that capture the life of an extraordinary aviator fighter pilot and leader Colonel Phil Handley In a career that spanned 26 years Hands earned a reputation as an exceptional pilot and leader in war and peace I do not know anybody who served with him who does not admire him for his dedication integrity and courage The central theme of the stories he relates is that the fraternity of true fighter pilots is made up of men who share a love of adventure have exceptional flying skills are willing to risk all rather than admit defeat and believe earning the respect of their peers is their greatest accomplishment The really good ones possess a sixth sense about people and machines that gives them an edge over mere mortals in the air and on the ground This is a book about a man who lived most of the stories and counts among his friends and acquaintances the central characters in the others It has been my privilege to have been his friend and fellow fighter pilot for the past 30 years General Ron Fogleman USAF Ret Chief of Staff USAF 1994 1997

*Teaching with Technology, Volume 2* G. Christopher Clark, Sherry A. Clouser, 2012 **Expanded Abstracts with Biographies**, 2001 **Knowledge Development in Transnational Projects** Verena Hachmann, 2016-05-20 Transnational learning has become a buzz phrase in European policy making and in multi national business Learning from the experiences of others is an idea that captivates practitioners and academics alike due to its simplicity and availability in a world that is increasingly characterised by cross border and global connections European regions in particular offer a diverse range of solutions to often shared challenges This provides a knowledge base for other regions to draw on through regional success stories publications of best practice and EU cooperation programmes This books explores transnational learning and knowledge transfer in co operation programmes and projects It argues that a deeper understanding of learning needs to be central to the implementation of programmes and projects in order to successfully meet their desired outcomes and goals By characterising some of the most important preconditions of transnational learning and introducing a process perspective to learning and transfer this book identifies barriers to learning and knowledge transfer and contributes to a stronger conceptualisation of the topic In doing so it opens up the black box of transnational learning and knowledge development providing a better understanding of its inner mechanisms It also provides practical recommendations for policy makers and

practitioners involved both at the programme and project level of transnational EU initiatives This book will be of interest to students researchers and policy makers alike working in geography political studies legal studies and European studies
