**Twentieth-century Popular Culture in Museums and Libraries** Fred E. H. Schroeder, 1981 Although libraries and museums for many centuries have taken the lead under one rationale or another in recovering storing and displaying various kinds of culture of their periods lately as the gap between elite and popular culture has apparently widened these repositories of artifacts of the present for the future have tended to drift more and more to what many people call the aesthetically pleasing elements of our culture The degree to which our libraries and museums have ignored our culture is terrifying when one scans the documents and artifacts of our time which if history in any wise repeats itself will in the immediate and distant future become valuable indices of our present culture to future generations As Professor Schroeder dramatically states it No doubt about it it is the contemporary popular culture that is the endangered species The essays in this book investigate the reasons for present day neglect of popular culture materials and chart the various routes by which conscientious and insightful librarians and museum directors can correct this disastrous oversight *Archi.Pop* D. Medina Lasansky, 2014-11-20 *Archi Pop* explores the relationship of architecture and design to popular culture through a variety of case studies including television music film magazines and domestic interiors Urban Residence Christien Klaufus, 2012 Riobamba and Cuenca two intermediate cities in Ecuador have become part of global networks through transnational migration incoming remittances tourism and global economic connections Their landscape is changing in several significant ways a reflection of the social and urban transformations occurring in contemporary Ecuadorian society Exploring the discourses and actions of two contrasting population groups rarely studied in tandem within these cities popular settlement residents and professionals in the planning and construction sector this study analyzes how each is involved in house designs and neighborhood consolidation Ideas ambitions and power relations come into play at every stage of the production and use of urban space and as a result individual decisions about both house designs and the urban layout influence the development of the urban fabric Knowledge about intermediate cities is crucial in order to understand current trends in the predominantly urban societies of Latin America and this study is an example of needed interdisciplinary scholarship that contributes to the fields of urban studies urban anthropology sociology and architecture
