Metaphysics And The Mind Body Problem:

Metaphysics and the Mind-body Problem Michael E. Levin, 1979 Defends the ancient thesis that man is a piece of matter that all his states are physical states and all his properties physical properties This is done in a metaphysical framework which accommodates talk of the identity and diversity of such virtual entities as states and properties without being committed to their actual existence

Mind in a Physical World Jaegwon Kim, 2000 This book based on Jaegwon Kim's 1996 Townsend Lectures presents the philosopher's current views on a variety of issues in the metaphysics of the mind in particular the mind body problem mental causation and reductionism This book based on Jaegwon Kim's 1996 Townsend Lectures presents the philosopher's current views on a variety of issues in the metaphysics of the mind in particular the mind body problem mental causation and reductionism Kim construes the mind body problem as that of finding a place for the mind in a world that is fundamentally physical Among other points he redefines the roles of supervenience and emergence in the discussion of the mind body problem Arguing that various contemporary accounts of mental causation are inadequate he offers his own partially reductionist solution on the basis of a novel model of reduction Retaining the informal tone of the lecture format the book is clear yet sophisticated

What Am I? Joseph Almog, 2001-12-27 In his *Meditations* René Descartes asks what am I His initial answer is a man But he soon discards it But what is a man Shall I say a rational animal No for then I should inquire what an animal is what rationality is and in this way one question would lead down the slope to harder ones Instead of understanding what a man is Descartes shifts to two new questions What is Mind and What is Body These questions develop into Descartes's main philosophical preoccupation the Mind Body distinction How can Mind and Body be independent entities yet joined essentially so within a single human being If Mind and Body are really distinct are human beings merely a construction On the other hand if we respect the integrity of humans are Mind and Body merely aspects of a human being and not subjects in and of themselves For centuries philosophers have considered this classic philosophical puzzle Now in this compact engaging and long awaited work UCLA philosopher Joseph Almog closely decodes the French philosopher's argument for distinguishing between the human mind and body while maintaining simultaneously their essential integration in a human being He argues that Descartes constructed a solution whereby the trio of Human Mind Body and Being are essentially interdependent yet remain each a genuine individual subject Almog's reading not only steers away from the most popular interpretations of Descartes but also represents a scholar coming to grips directly with Descartes himself In doing so Almog creates a work that Cartesian scholars will value and that will also prove indispensable to philosophers of language ontology and the metaphysics of mind

The Mind-Body Problem and Metaphysics Ralph Stefan Weir, 2023-07-21 This book evaluates the widespread preference in philosophy of mind for varieties of property dualism over other alternatives to physicalism It takes the standard motivations for property dualism as a starting point and argues that these lead directly to nonphysical substances resembling the soul of traditional metaphysics In the first half of

the book the author clarifies what is at issue in the choice between theories that posit nonphysical properties only and those that posit nonphysical substances The crucial question he argues is whether one posits nonphysical things that satisfy an Aristotelian Cartesian independence definition of substance nonphysical things that could exist in the absence of anything else In the second half the author argues that standard and Russellian monist forms of property dualism are far less plausible than we usually suppose Most significantly the presuppositions of one of the leading arguments for property dualism the conceivability argument lead by parity of reasoning to the view that conscious subjects are nonphysical substances He concludes that if you posit nonphysical properties in response to the mind body problem then you should be prepared to posit nonphysical substances as well Mainstream philosophy of mind must take nonphysical substances far more seriously than it has done for the best part of a century The Mind Body Problem and Metaphysics will be of interest to scholars and advanced students working in philosophy of mind metaphysics and the history of philosophy

Physicalism and Mental Causation Sven Walter, Heinz-Dieter Heckmann, 2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e g the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field

Structure and the Metaphysics of Mind William Jaworski, 2016 Structure and the Metaphysics of Mind is the first book to show how hylomorphism can be used to solve mind body problems persistent problems understanding how thought feeling perception and other mental phenomena fit into the physical world described by our best science Hylomorphism claims that structure is a basic ontological and explanatory principle Some individuals paradigmatically living things consist of materials that are structured or organized in various ways Those structures are responsible for individuals being the kinds of things they are and having the kinds of powers or capacities they have From a hylomorphic perspective mind body problems are byproducts of a worldview that rejects structure Hylomorphic structure carves out distinctive individuals from the otherwise undifferentiated sea of matter and energy described by our best physics and it confers on those individuals distinctive powers including the powers to think feel and perceive A worldview that rejects hylomorphic structure lacks a basic principle which distinguishes the parts of the physical universe that can think feel and perceive from those that can't and without such a principle the existence of those powers in the physical world can start to look inexplicable and mysterious But if mental phenomena are structural phenomena as hylomorphism claims then they are uncontroversially

part of the physical world for on the hylomorphic view structure is uncontroversially part of the physical world Hylomorphism thus provides an elegant way of solving mind body problems

History of the Mind-Body Problem Tim Crane, Sarah Patterson, 2012-10-12 History of the Mind Body Problem is a collection of new essays by leading contributors on the various concerns that have given rise to and informed the mind body problem in philosophy The essays in this stellar collection discuss famous philosophers such as Aristotle Aquinas and Descartes and cover the subjects of the origins of the qualia and intentionality

Unsnarling the World-Knot David Ray Griffin, 2008-03-25 The mind body problem which Schopenhauer called the world knot has been a central problem for philosophy since the time of Descartes Among realists those who accept the reality of the physical world the two dominant approaches have been dualism and materialism but there is a growing consensus that if we are ever to understand how mind and body are related a radically new approach is required David Ray Griffin develops a third form of realism one that resolves the basic problem common to dualism and materialism of the continued acceptance of the Cartesian view of matter In dialogue with various philosophers including Dennett Kim McGinn Nagel Seager Searle and Strawson Griffin shows that materialist physicalism is even more problematic than dualism He proposes instead a panexperientialist physicalism grounded in the process philosophy of Alfred North Whitehead Answering those who have rejected panpsychism as obviously absurd Griffin argues compellingly that panexperientialism by taking experience and spontaneity as fully natural can finally provide a naturalistic account of the emergence of consciousness an account that also does justice to the freedom we all suppose in practice

Physicalism Deconstructed Kevin Morris, 2019 Provides a philosophical and historical critique of contemporary conceptions of physicalism especially non reductive levels based approaches to physicalist metaphysics Challenging assumptions about the mind body problem this accessible book will interest scholars working in metaphysics philosophy of mind and philosophy of science

Necessity and Truthful Fictions Amihud Gilead, 2009 This book discovers areas and themes especially in philosophical psychology for novel observations and investigations the diversity of which is systematically unified within the frame of the author s original metaphysics panenmentalism The book demonstrates how by means of truthful fictions we may detect meaningful possibilities as well as their necessary relationships that otherwise could not be discovered

Metaphysics and the Mind-body Problem Ralph Weir, 2019

Concrete Particulars Daniel Giberman, 2024-06-07 This book presents a novel metaphysics of concrete entities The author uses the theory developed to address three major topics in the metaphysics of concreta fundamentality persistence over time and phenomenal consciousness The book provides a new theory of what bundles particular property instances or tropes into material property bearers The theory is based on two new ideas The first is that the primitive nature of one sui generis monadic property called markedness bears on the bundling of other properties tropes The second idea is that the geometric and topological features of a given markedness trope help to determine which tropes it bundles The author argues that this new markedness bundle theory determines all property co instantiation at the levels of both type and

token positioning markedness tropes as the fundamental concreta The theory also explains bundling across time yielding an advantageous account of material persistence Finally markedness tropes operate as de facto panprotopsychist property instances fundamental non consciousness tropes that uniquely explain where and why consciousness properties are exemplified The book solidifies the case for markedness through sustained critical analysis of competing theories of fundamentality and persistence focusing in part on their inability to account for unending mereological and plural structures Concrete Particulars will appeal to scholars and advanced students working in metaphysics and philosophy of mind

Hard Problem of consciousness and emphasizing the distinctive interest of its diachronic dimension Ranging from philosophy to biology and neuroscience it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection This is an original engaging and thought provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness
