USA Patent Office

Moving Pattern:

Specifications and Drawings of Patents Issued from the United States Patent Office United States. Patent Office, 1906 Applied Pattern Recognition Horst Bunke, Abraham Kandel, Mark Last, 2008-02-28 A sharp increase in the computing power of modern computers accompanied by a decrease in the data storage costs has triggered the development of extremely powerful algorithms that can analyze complex patterns in large amounts of data within a very short period of time Consequently it has become possible to apply pattern recognition techniques to new tasks characterized by tight real time requirements e g person identification and or high complexity of raw data e g clustering trajectories of mobile objects The main goal of this book is to cover some of the latest application domains of pattern recognition while presenting novel techniques that have been developed or customized in those domains Tutorials on Motion Perception Alexander H. Wertheim, 2012-12-06 From August 24 29 1980 the international Symposium on the Study of Motion Perception Recent Developments and Applications sponsored by NATO and organized by the editors of this book was held in Veldhoven the Netherlands The meeting was attended by about eighty scholars including psychologists neurologists physicists and other scientists from fourteen different countries During the symposium some fifty research papers were presented and a series of tutorial review papers were read and discussed The research presentations have been published in a special issue of the international journal of psychonomics Acta Psychologica Vol 48 1981 The present book is a compilation of the tutorial papers The tutorials were arranged around early versions of the chapters now appearing in this book The long discussions at the Veldhoven tutorial sessions resulted in extensive revisions of the texts prior to this publication Unfortunately this led to a delay in publication but we feel that this was justified by a greater depth of understanding which in our opinion has significantly increased the quality of the book As they now stand the chapters cover most of the issues relevant to the study of motion perception Also they clearly reflect the intensive exchange of knowledge that took place during the symposium As such we think that this book can be used both as an advanced text for students and scientists alike and as a comprehensive reference source Database and Expert Systems Applications Abdelkader Hameurlain, Rosine Cicchetti, Roland Traummüller, 2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 2 6 2002 at the Universit Aix Marseille II France The quickly growing field of information systems required the establishment of more specialized discussion platforms the DaWaK conference EC Web conference eGOV conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence The resulting book was prepared with great effort Starting with the preparation of submitted papers the papers went through the reviewing process The accepted papers were revised to final versions by their authors and arranged to the conference program This year 241 papers were submitted and our thanks go to all who have contributed The program committee and the supporting reviewers produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation

The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered In this way DEXA has blazed the trail At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible These are IUT Universit Aix Marseille II FAW DEXA Association the Austrian Computer Society and Microsoft Research **Official Gazette of the United States Patent Office** United States.
