Post Human:

Representations of the Post/human Elaine L. Graham, 2002 This work draws together a wide range of literature on contemporary technologies and their ethical implications It focuses on advances in medical reproductive genetic and information technologies

The Future of Post-Human Martial Arts Peter Baofu, 2009-10-02 Is it really true that martial arts in spite of their popularity in this day and age of ours have at their deepest level the promised land of self knowledge the expression of beauty or something highly spiritual to be pursued for the human soul Or to put it in a different way what exactly makes martial arts so amazing that somehow they will eventually lead the practitioners to the spiritual realm of self cultivation in its highest depth Contrary to the conventional wisdom about martial arts as held by many over the ages this popular view about martial arts has become so legendary that their dark sides have yet to be systematically explored and that the lofty aims of martial arts are neither possible nor desirable to the extent that their proponents would like us to believe Of course this is not to say that the very tradition of martial arts is absolutely useless or that the literature on martial arts hitherto existing in history is spiritually unworthy to be appreciated Instead this book constructively offers an alternative better way to understand the nature of martial arts in special relation to the body and spirit of warriors while learning from different views in the literature without favoring any one of them nor integrating them as they are not necessarily compatible with each other and in the end transcending them towards a new horizon not conceived before This seminal view if proven valid will fundamentally change the legendary way that people have thought about martial arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate _____

The Future of Post-Human Culinary Art Peter Baofu, 2013-01-03 Is culinary art really so exact that as Delia Smith once wrote cooking is an exact art and not some casual game BQ 2012 This exact view of cooking can be contrasted with an opposing observation by Tom Jaine when he argued that if cooking becomes an art form rather than a means of providing a reasonable diet then something is clearly wrong BQ 2012a Contrary to these opposing views and other ones as will be discussed in the book culinary art in relation to both ingredients and techniques is neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe Needless to say this challenge to the opposing views of cooking does not mean that culinary art has no practical value or that those interdisciplinary fields related to culinary art like food science nutritional economics food chemistry food aesthetics the ethics of killing for food molecular gastronomy food rheology food photography Shechita the science of aphrodisiacs and so on are unimportant Of course neither of these extreme views is reasonable Rather this book offers an alternative better way to understand the future of culinary art especially in the dialectic context of ingredients and techniques while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other More specifically this book offers a new theory that is the

inquisitive theory of culinary art to go beyond the existing approaches in a novel way If successful this seminal project is to fundamentally change the way that we think about culinary art in relation to ingredients and techniques from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate

The Future of Post-Human Organization Peter Baofu,2009-10-02 What exactly makes the nature of organizations so miracular that their very purpose is to achieve performance and that it is now regarded in this capitalist age of ours as the central aim to be both possible and desirable for any organization After all there is simply no lack of organizations which achieve performance with questionable means and goals be they about greed and excess in the corporate world or evil and injustice in the public sphere just to cite two main examples although there are others too of course Contrary to the conventional wisdom preciously accepted by many contemporaries this obsessive craze for organizational performance is fast becoming a seductive trend such that the dark sides of organizational performance have yet to be systematically understood and that its very purpose is neither possible nor desirable to the extent that its proponents would like us to believe Needless to say this is not to suggest that the purpose of organizations is to reject performance or that the literature in organizational studies and other related fields like political science media studies and business management for example hitherto existing in history are full of scholarly worthlessness The aim of this book however is to provide an alternative better way to understand the nature of organization in special relation to communication decision making and leadership while learning from different views in the literature without favoring any one of them nor integrating them and in the end transcending them in a new direction not thought before This seminal project if successful will radically change the way that we think about the nature of organization from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate

The Future of Post-Human Accounting Peter Baofu,2014-06-03 This book reexamines opposing views on accounting offering a new theory the double sided theory of accounting It explores the dialectic relationship between addition and subtraction considering perspectives from mind nature society and culture with implications for the human future and post human fate

The Future of Post-Human War and Peace Peter Baofu,2010-04-16 Is peace really so precious that it is popularly viewed in irenology peace studies of our time as natural and a prime force in human behavior whereas war its opposite is instead condemned as sinful and not natural In fact there is even the prestigious Nobel peace prize to be awarded to those who contribute to world peace but not an equivalent Nobel war prize to those who do the contrary This euphoric view of peace is by no means a constant conventional wisdom in human history as it can be sharply contrasted with an equally seductive view of war in polemology war studies For instance only several decades ago the well known writer Thomas Mann once approvingly asked about war Is not peace an element of civil corruption and war a purification a liberation an enormous hope WK 2009a This fickleness of conventional wisdom on war and peace has blinded us from the dark sides of

both war and peace with the consequence of impoverishing our understanding of the human condition and its future. Contrary to the two opposing sides of this conventional wisdom in its fickle history war and peace are neither possible nor desirable to the extent that their respective ideologues would like us to believe. In addition war and peace cannot exist with each other. Of course this is not to suggest that irenology, peace studies and polemology, war studies are worthless or that other fields of study related to war studies and peace studies like political science, economics, psychology, sociology, international relations, history, anthropology, religious studies, gender studies as well as a variety of others should be ignored.

WK 2009: Needless to say neither of these two extreme views is reasonable either. Instead this book accepts the challenging task to provide an alternative, better way to understand the nature of war and peace especially in relation to aggression and pacificity while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other. Thus this book offers a new theory to transcend the existing approaches in the literature on war and peace in a way not conceived before. If successful this seminal project is to fundamentally change the way that we think about war and peace from the combined perspectives of the mind, nature, society and culture with enormous implications for the human future and what I originally called its post human fate.

Posthuman Life David Roden, 2014-10-10: We imagine posthumans as humans made superhumanly intelligent or resilient by future advances in nanotechnology, biotechnology, information technology and cognitive science. Many argue that these enhanced people might live better lives, others fear that tinkering with our nature will undermine our sense of our own humanity. Whoever is right it is assumed that our technological successor will be an upgraded or degraded version of us. Human 2.0: Posthuman Life argues that the enhancement debate projects a human face onto an empty screen. We do not know what will happen and not being posthuman cannot anticipate how posthumans will assess the world. If a posthuman future will not necessarily be informed by our kind of subjectivity or morality the limits of our current knowledge must inform any ethical or political assessment of that future. Posthuman Life develops a critical metaphysics of posthuman succession and argues that only a truly speculative posthumanism can support an ethics that meets the challenge of the transformative potential of technology.

The Posthuman Rosi Braidotti, 2013-07-11: The Posthuman offers both an introduction and major contribution to contemporary debates on the posthuman. Digital, second life, genetically modified food, advanced prosthetics, robotics and reproductive technologies are familiar facets of our globally linked and technologically mediated societies. This has blurred the traditional distinction between the human and its others, exposing the non-naturalistic structure of the human. The Posthuman starts by exploring the extent to which a post-humanist move displaces the traditional humanistic unity of the subject. Rather than perceiving this situation as a loss of cognitive and moral self-mastery Braidotti argues that the posthuman helps us make sense of our flexible and multiple identities. Braidotti then analyzes the escalating effects of post-anthropocentric thought which encompass not only other species but also the sustainability of our planet as a whole. Because

contemporary market economies profit from the control and commodification of all that lives they result in hybridization erasing categorical distinctions between the human and other species seeds plants animals and bacteria These dislocations induced by globalized cultures and economies enable a critique of anthropocentrism but how reliable are they as indicators of a sustainable future The Posthuman concludes by considering the implications of these shifts for the institutional practice of the humanities Braidotti outlines new forms of cosmopolitan neo humanism that emerge from the spectrum of post colonial and race studies as well as gender analysis and environmentalism The challenge of the posthuman condition consists in seizing the opportunities for new social bonding and community building while pursuing sustainability and empowerment
