

Concepts

- * PostgreSQL is a *relational database management system (RDBMS)*. That means it is a system for managing data stored in *relations*.
- * Each table is a named collection of *rows*. Each row of a given table has the same set of named *columns*, and each column is of a specific data type.
- * Tables are grouped into *databases*, and a collection of databases managed by a single PostgreSQL server instance constitutes a *database cluster*.
