Potassium Its Biologic Significance:

Potassium Its Biol Significance Robert Whang, 1983-09-20 Abstract Eleven authoritative review articles written for nutrition scientists and clinicians address various general aspects of potassium K metabolism the interrelationships between K and magnesium Mg as applied to the heart and clinical aspects of how K and Mg affect heart activity While clinically oriented the major thrust of the reviews is toward developing an understanding of intracellular events occurring in perturbed K metabolism and the association of Mg with K metabolism General aspects include the role of K in biological evolution methods for K analysis K metabolism nutritional factors associated with K metabolism and the dysfunctions of hypo and hyperkalemia Clinical aspects include heart function relative to cellular K fluxes an overview of glucose insulin K infusion in cases of myocardial infarction K and Mg as related to digitalis toxicity and extra and intracellular K Mg diuretics and arrhythmias wz Mineral Tolerance of Animals National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Minerals and Toxic Substances in Diets and Water for Animals, 2006-01-22 Excess minerals in the diet and water of animals can have an adverse effect on animal health consumers and the environment Preventing unsafe mineral exposure is a fundamental part of animal nutrition and management At the request of the Food and Drug Administration the National Academies convened a committee to make recommendations on animal tolerances and toxic dietary levels updating a 1980 report on mineral tolerance in domestic animals Based on a review of current scientific data and information the report sets a maximum tolerable level MTL for each mineral as it applies to the diets of farm animals poultry and fish The report includes an analysis of the effects of toxic levels in animal diets and it identifies elements that pose potential human health concerns The report recommends research that includes a better characterization of animal exposure to minerals through feedstuffs a better understanding of the relationship between mineral concentrations in feed and water and the levels in consumer products such as meat milk and eggs and more research on the maximum tolerable level of minerals for aquatic and companion animals **Handbook on Metalloproteins** Ivano Bertini, Astrid Sigel, 2001-06-29 This Handbook on Metalloproteins focuses on the available structural information of proteins and their metal ion coordination spheres It centers on the metal ions indispensable for life but also considers metal ions used as substitution probes in studies of metalloproteins Emphasizing the structure function relationship the book covers the common **The Uniqueness of Biological Materials** A. E. Needham, 2013-10-22 The Uniqueness of Biological Materials deals with the unique properties of biological materials carbohydrates lipids proteins and nucleic acids and the extent to which this uniqueness is related to the uniqueness of life in general More specifically it examines whether the uniqueness of life is inherent in the material of living organisms This volume is comprised of 32 chapters and begins with an introduction to the nature of biological uniqueness and how it is related to the uniqueness of life by comparing the elemental composition of living organisms with that of their environment The discussion then turns to the uniqueness of hydrogen and oxygen which

make up water carbon carbohydrates and ternary compounds that are more fully oxidized than carbohydrates Ternary compounds of intermediate grades of reduction are also considered along with fatty acids and related lipids paraffins and olefins and ternary unsaturated compounds Other biological materials discussed include peptides proteins amino acids and halogens This book will be of interest to students and practitioners of biology and biochemistry Quality Attributes and their Measurement in Meat, Poultry and Fish Products A. M. Pearson,2013-11-09 The theme for this volume was chosen because no previous book has discussed the quality attributes of meat poultry and fish and the methods that can be utilized for their measurement The topics are not only timely but of great importance Chapter I provides an introduction to the topic and presents a brief overview of the subject to be discussed The next two chapters review information on the importance of color and some color problems in muscle foods and explains the basis of color vision and perception of color before describing the methods that may be used for its measure ment The following chapter discusses water binding and juiciness and their importance while Chapter 5 provides the first intensive modern review on measurement of juiciness that has been published to the knowledge of the author and editors Chapter 6 reviews the physiology and psychology of flavor and aroma which serves as a background for further discussion on the flavor and aroma of foods The next chapter discusses the chemistry of flavor and aroma in muscle foods while measurement of flavor and aroma are covered in Chapter 8 Chapter 9 reviews the species specific meat flavors and aromas Chapter 10 reviews some flavor and aroma problems in muscle foods and their measurement
