Postmodern Metaphysics:

Postmodern Metaphysics Chrēstos Giannaras, 2004 Christos Yannaras's book is an important contribution to the theology science debate. It offers a respectable alternative to creationist resistance to materialistic evolutionism. It shows how spiritual reality transcends the categories of chance and necessity that materialists believe can explain everything. It argues passionately for the priority of relationality and reciprocity, the spiritual dimension through which we can discover God's causality and so enter into personal relation with him. **BOOK JACKET** *Religion, Metaphysics, and the Postmodern*

Christopher Ben Simpson, 2009 Engages two provocative contemporary philosophers of religion **Being and Value**

Frederick Ferre, 1996-02-22 *Being and Value* begins with a discussion on metaphysics showing the vital relationship between human life and the philosophical placement of value and emphasizing the current transition from the old mechanical worldview to the postmodern alternative inspired by ecology. *Being and Value* shows how intimately premodern philosophy bound value into the fabric of things and analyzes the expulsion of value from factual being during the modern period. Special attention is given to beauty. What is the relationship between the subjective and objective conditions of beauty? Is the beauty of nature merely the product of human appreciation? The answer is that beauty and value is a more potent ingredient in the structure of things than modern reductionism allows. *Postmodernism and the Environmental Crisis* Arran

Gare, 2006-08-21 *Postmodernism and the Environmental Crisis* is the only book to combine cultural theory and environmental philosophy. In it Arran Gare analyses the conjunction between the environmental crisis, the globalisation of capitalism and the disintegration of the culture of modernity. It explains the paradox of growing concern for the environment and the paltry achievements of environmental movements. Through a critique of the philosophies underlying approaches to the environmental crisis, Arran Gare puts forward his own controversial theory of a new postmodern world view. This would be the foundation for the environmental movement to succeed. Arran Gare's work will be a vital reading for advanced students of environmental studies as well as for environmental philosophers and cultural theorists. **Goddess as Nature** Paul

Reid-Bowen, 2016-04-15 *Goddess as Nature* makes a significant contribution to elucidating the meaning of a female and feminist deity at the beginning of the twenty-first century. Bridging the gap between the emergent religious discourse of theology and a range of analytical concerns in the philosophy of religion, the author argues that theology is not as incoherent as many of its critics claim. By developing a close reading of the reality claims embedded within a range of theological texts, one can discern an ecological and pantheistic concept of deity and reality that is metaphysically novel and in need of constructive philosophical, theological, and scholarly engagement. Philosophical theology is in an age concerned with re-conceiving nature in terms of agency, chaos, complexity, ecological networks, and organicism, both an active possibility and a remarkably valuable academic, feminist, and religious endeavour. **The Metaphysics of Media** Peter K.

Fallon, 2009 Why do we believe what we believe and ignore what we don't believe? Why do we believe some things that have

no foundation in reality and refuse to believe in things that are firmly supported by scientific research Why does it seem that many people believe in nothing at all And does it matter what we believe and how we came to that decisive point of belief or unbelief Peter K Fallon insists that neither the study nor the practice of ethics and metaphysics should be limited to professional academic philosophers and theologians In *The Metaphysics of Media* Fallon takes a courageous stand against our hyper mediated popular culture and the postmodern view of information as a salable commodity He investigates how and why different media through different historical eras have engendered and supported certain concepts of reality at the expense of others He begins with a critical discussion of the essential idea of objective reality and truth Fallon then unfolds the story of the evolution of communication through four major eras and the metaphysical foundation that underlies each era and concludes with a look at the troubling rise of mass ignorance in what we call without a hint of irony an age of information

R sum de l diteur **Postmodern Theory** Steven Best, Douglas Kellner, 1991 The authors systematically interrogate postmodern theory to evaluate its relevance for critical social theory and radical politics today The book contains an introduction and critique to the work of Foucault Deleuze and Guattari and an introduction to postmodern feminist theory

Postmodern Studies, 2003 [Myths of the Self](#) Olav Bryant Smith, 2004-01-01 *Myths of the Self* is a departure from the standard fare of postmodern thought In a unique and brilliant turn Smith argues that the best way of dealing with the topic of the self is a synthesis of a narrative theory of identity using Ricoeur as a source along with the constructive postmodern metaphysics of Alfred North Whitehead The resulting synthesis is a new and potentially invigorating spin on the genesis of postmodern thought

Erich Przywara and Postmodern Natural Law Graham James McAleer, 2019-10-31 Graham McAleer's *Erich Przywara and Postmodern Natural Law* is the first work to present in an accessible way the thinking of Erich Przywara 1889 1972 for an English speaking audience Przywara's work remains little known to a broad Catholic audience but it had a major impact on many of the most celebrated theologians of the twentieth century including Hans Urs von Balthasar Karl Rahner Edith Stein and Karl Barth Przywara's ground breaking text *Analogia Entis* The analogy of being brought theological metaphysics into the modern era While the concept of analogy of being is typically understood in static terms McAleer explores how Przywara transformed it into something dynamic McAleer shows the extension of Przywara's thought into a range of disciplines from a new theory of natural law to an explanation of how misunderstanding the analogy of being lies at the foundation of the puzzles of modernity and postmodernity He demonstrates through Przywara's conceptual framework how contemporary moral problems such as those surrounding robots Islam and sumptuary laws Nazism including fascism and race embryos migration and body modification among others are shaped by the failure of Western thought to address metaphysical quandaries McAleer updates Przywara for a new audience searching for solutions to the failing humanism of the current age This book will be of interest to intellectuals and scholars in a wide range of disciplines within philosophy or theology and will appeal especially to those interested in systematic and moral theology

Postmodern Gaming Tilman Kuchler,1994 This is a substantial contribution to the contemporary theoretical discourse It draws on the works of Heidegger Gadamer Lyotard Derrida and others to show the centrality of play for an effective critique of structures of metaphysical thinking The author argues that it is the notion of play that allows us to understand postmodernity as a project that asserts the need to continue the modern tradition with a truly critical agenda

Postmodern Philosophy and Law Douglas E. Litowitz,1997 The author presents a two tiered analysis that views postmodern legal thought as both a collective intellectual movement and as the work of particular theorists notably Friedrich Nietzsche Michel Foucault Jacques Derrida Francois Lyotard and Richard Rorty He concludes that even though postmodern thought does not give rise to a normative theory of right that can be used as a framework for deciding cases it can focus attention on genealogy and discourse and can empower those who have been denied a voice in the legal system Annotation copyrighted by Book News Inc Portland OR **Arc** ,2006 **Canadian Philosophical Reviews** ,1996 **Religious**

Experience and the End of Metaphysics Jeffrey Bloechl,2003 Does religious thinking stand in opposition to postmodernity Does the existence of God present the ultimate challenge to metaphysics Strands of continental thought especially those running from Kant Husserl and Heidegger focus on individual consciousness as the horizon for all meaning and provide modern philosophy of religion with much of its present ferment In *Religious Experience and the End of Metaphysics* 11 influential continental philosophers share the conviction that religious thinking cannot afford to disengage from the challenges of modern European philosophy Together they provide a rich and intriguing set of answers to questions surrounding the meaning of religious experience Topics include subjectivity selfhood and rationality language community and ethics the influence of Jewish and eastern religions on religious experience God as phenomenology and religion in the postmodern age These lucid and arresting essays bring together many of the leading voices in the contemporary continental debate on God and religion

The Language of Post-modern Architecture Charles Jencks,1991 A classic account which when written in 1977 was the first to define post modernism in architecture an event which led to subsequent adoption of the term in many other fields It is the story of the failure of modern architecture to communicate with its users and the attempt of post modernists to overcome this failure with a richer more widely shared language post modern classicism This edition 5th in 1987 brings the account and the great illustrations up to date 101 4x121 2 Annotation copyrighted by Book News Inc Portland OR *International Studies in Philosophy* ,1974 *The New Scholasticism* ,1998 Includes section Book Reviews
