

THE POSTURAL COMPLEX

Observations as to Cause, Diagnosis and Treatment

(Continued from Front Cover)

Different radiographic techniques are described which measure the exact difference of leg lengths, and another for lateral rotatory shifts that cause changes in pelvic position.

There is a detailed description of special methods for history and physical examination.

Highly specialized methods of treatment.

The final chapters are devoted to a clinical evaluation and summary.

SPECIAL FEATURE

One chapter has special interest as it analyzes five hundred cases having chronic low back pain, with or without sciatica, derived from the practices of the author and three independent observers. All had been previously intractable to the usual accepted methods of treatment. The greater number (85 per cent) were given symptomatic benefit by fixed rigid postural shoe corrections and adjunct therapy. The entire work is profusely illustrated with eighty figures, some of these compounded from as many serial x-rays.

SUMMARY

An almost universal rotatory deviation in the feet and legs has been found to cause a series of deviational changes. Some of these result in local symptoms as exemplified by a great variety of postural cosmetic defects and localized neuralgias. Others are general symptoms stemming from a tension of the entire central nervous system with or without localized root tension neuralgias. When present these may occur at single or multiple levels. In this category are found such common complaints as cervical osteoarthritis, thoracic radiculitis, low back pain, sciatica, and other foot and leg pains of numerous common types. General effects result in such extremely common complaints as fatigue, and combinations of the local and general effects give rise to numerous single and multiple varieties of fibrositis, periarthritis, and arthritis.

CASE HISTORIES

Case histories are analyzed in which postural imbalance was a primary, and in others a secondary, aggravating factor in the maintenance of disabling symptoms.

NEW METHOD OF CORRECTION

Particular attention is called to the fact that this method of correction differs radically from any previously described—attesting validity of all the component corrective factors.
