

# Red Giants and White Dwarfs

- Red Giants and Supergiants:
  - No longer a main sequence star, the Sun will become a **red giant** in about 5 billion years.
  - As its core contracts and heats to 100 million degrees, helium nuclei will fuse into **carbon**.
  - Its outer layers will expand as the sun swells to about 2 AU in diameter.
- Becoming a White Dwarf:
  - A star like the Sun will use up its helium and its core will contract even more.
  - The Sun's outer layers will escape to space leaving behind a hot, dense core: a "**white dwarf**."
  - A white dwarf is only about the size of the Earth.
