Model Theory And Modules:

Model Theory and Modules Mike Prest, 2014-05-14 Professor Prest is the first to address the topic of the development of the interplay between model theory and the theory of modules In recent years the relationship between model theory and other branches of mathematics has led to many profound and intriguing results This self contained introduction to the subject introduces the requisite model theory and module theory as it is needed It then develops the basic ideas of determining what can be said about modules using the information that may be expressed in first order language Later chapters discuss stability theoretic aspects of modules and structure and classification theorems over various types of rings and for certain classes of modules

[Model Theory of Modules, Algebras and Categories](#) Alberto Facchini, Lorna Gregory, Sonia L'Innocente, Marcus Tressl, 2019-05-31 This volume contains the proceedings of the international conference Model Theory of Modules Algebras and Categories held from July 28 August 2 2017 at the Ettore Majorana Foundation and Centre for Scientific Culture in Erice Italy Papers contained in this volume cover recent developments in model theory module theory and category theory and their intersection

Functor Categories, Model Theory, Algebraic Analysis and Constructive Methods Alexander Martsinkovsky, 2024-05-04 This volume comprises selected contributions by the participants of the second Functor Categories Model Theory Algebraic Analysis and Constructive Methods conference which took place at the University of Almer a Spain in July 2022 The conference was devoted to several seemingly unrelated fields functor categories model theory of modules algebraic analysis including linear control systems and constructive category theory to mention just a few The

fact that these fields are actually related is a very recent realization. The connections between these disciplines are changing in real time and the goal of this volume is to provide an initial reference point for this emerging interdisciplinary field. Besides research articles, the volume includes two extended lectures: one on constructive methods in algebraic analysis and the other on the functorial approach to algebraic systems theory. Hence, in addition to its interest for researchers, the volume will also be an invaluable resource for newcomers.

Advances in Algebra and Model Theory M. Droste, R. Gobel, 1998-01-29. Contains 25 surveys in algebra and model theory, all written by leading experts in the field. The surveys are based around talks given at conferences held in Essen 1994 and Dresden 1995. Each contribution is written in such a way as to highlight the ideas that were discussed at the conferences and also to stimulate open research problems in a form accessible to the whole mathematical community. The topics include field and ring theory as well as groups, ordered algebraic structure, and their relationship to model theory. Several papers deal with infinite permutation groups, abelian groups, modules, and their relatives and representations. Model-theoretic aspects include quantifier elimination in skew fields, Hilbert's 17th problem, \aleph_0 categorical structures, and Boolean algebras. Moreover, symmetry questions and automorphism groups of orders are covered. This work contains 25 surveys in algebra and model theory, each written in such a way as to highlight the ideas that were discussed at conferences and also to stimulate open research problems in a form accessible to the whole mathematical community.

Some Model Theory of Modules Ivo Herzog, 1991.

Model Theoretic Algebra With Particular Emphasis on Fields, Rings, Modules Christian U. Jensen, 2022-03-10. This volume highlights the links between model theory and algebra. The work contains a definitive account of algebraically compact modules, a topic of central importance for both module and model theory. Using concrete examples, particular emphasis is given to model-theoretic concepts such as axiomizability. Pure mathematicians, especially algebraists, ring theorists, logicians, model theorists, and representation theorists should find this an absorbing and stimulating book.

Bulletin of the Belgian Mathematical Society, Simon Stevin, 2006.

Algebraic Model Theory Bradd T. Hart, A. Lachlan, Matthew A. Valeriote, 2013-03-14. Recent major advances in model theory include connections between model theory and Diophantine and real analytic geometry, permutation groups, and finite algebras. The present book contains lectures on recent results in algebraic model theory covering topics from the following areas: geometric model theory, the model theory of analytic structures, permutation groups in model theory, the spectra of countable theories, and the structure of finite algebras. Audience: Graduate students in logic and others wishing to keep abreast of current trends in model theory. The lectures contain sufficient introductory material to be able to grasp the recent results presented.

Groups, Modules, and Model Theory - Surveys and Recent Developments Manfred Droste, László Fuchs, Brendan

Goldsmith, Lutz Strümgmann, 2017-06-02 This volume focuses on group theory and model theory with a particular emphasis on the interplay of the two areas. The survey papers provide an overview of the developments across group module and model theory while the research papers present the most recent study in those same areas. With introductory sections that make the topics easily accessible to students, the papers in this volume will appeal to beginning graduate students and experienced researchers alike. As a whole, this book offers a cross-section view of the areas in group module and model theory covering topics such as DP minimal groups, Abelian groups, countable 1-transitive trees, and module approximations. The papers in this book are the proceedings of the conference New Pathways between Group Theory and Model Theory which took place February 14, 2016 in Mülheim an der Ruhr, Germany, in honor of the editor's colleague Rüdiger Göbel. This publication is dedicated to Professor Göbel, who passed away in 2014. He was one of the leading experts in Abelian group theory.
