Neurocomputing Françoise Fogelman Soulié, Jeanny Herault, 2012-12-06 This volume contains the collected papers of the NATO Conference on Neurocomputing held in Les Arcs in February 1989 For many of us this conference was reminiscent of another NATO Conference in 1985 on Disordered Systems 1 which was the first conference on neural nets to be held in France To some of the participants that conference opened in a way the field of neurocomputing somewhat exotic at that time and also allowed for many future fruitful contacts Since then the field of neurocomputing has very much evolved and its audience has increased so widely that meetings in the US have often gathered more than 2000 participants However the NATO workshops have a distinct atmosphere of free discussions and time for exchange and so in 1988 we decided to go for another session This was a case for me and some of the early birds of the 1985 conference to realize how much and how little too the field had matured

Parle '91 Parallel Architectures and Languages Europe Emile H.L. Aarts, Jan van Leeuwen, Martin Rem, 2013-11-11 The innovative progress in the development of large and small scale parallel computing systems and their increasing availability have caused a sharp rise in interest in the scientific principles that underlie parallel computation and parallel programming The biannual Parallel Architectures and Languages Europe PARLE conferences aim at presenting current research material on all aspects of the theory design and application of parallel computing systems and parallel processing At the same time the goal of the PARLE conferences is to provide a forum for researchers and practitioners to exchange ideas on recent developments and trends in the field of parallel computing and parallel programming The first two conferences PARLE 87 and PARLE 89 have succeeded in meeting this goal and made PARLE a conference that is recognized worldwide in the field of parallel computation PARLE 91 again offers a wealth of high quality research material for the benefit of the scientific community Compared to its predecessors the scope of PARLE 91 has been broadened so as to cover the area of parallel algorithms and complexity in addition to the central themes of parallel architectures and languages The proceedings of the PARLE 91 conference contain the text of all contributed papers that
