The New Law of Peaceful Protest David Mead, 2010-04-06 As well as providing a rigorous analysis this book is underpinned by several thematic discussions that run throughout the text

Facilitating peaceful protest Great Britain: Parliament: Joint Committee on Human Rights, 2011-03-25 The Joint Committee on Human Rights JCHR has published a report on the policing of recent protests in central London and the preparations for the forthcoming March for the Alternative planned for this Saturday 26 March 2011 The policing of protest engages several human rights including freedom of expression and assembly the right to life the prohibition against inhuman or degrading treatment and rights to liberty and privacy The report welcomes the advance cooperation between the police and organisers of the TUC march and the planned involvement of human rights observers in the control room on the day of the march itself It also welcomes police initiatives to communicate better with protestors by using leaflets and Twitter But concerns remain about kettling and the use of batons including a lack of clarity about the circumstances in which the police can resort to containment or kettling and the apparent lack of opportunity for non violent protesters to leave the lack of specific guidance setting out the circumstances in which the use of the baton against the head might be justifiable To meet the human rights requirement that the use of force should be proportionate operational guidance to frontline officers needs to address this issue specifically and directly the need for a nimble system for assimilating lessons learned

[Violence in South Africa](#) Eliree Bornman, René Van Eeden, Marie Wentzel, 1998 Violence in South Africa contains contributions on various issues related to violence in South Africa The variety of perspectives explanations and intervention strategies indicates that violence its causes and prevention are diverse and complex matters Hence a single perspective or universal explanation cannot properly explain the phenomenon Factors related to the micro and macro levels as well as the interaction between these levels should be considered The contributions consequently do not deal only with violence of a structural collective or political nature but also the far more prevalent forms of interpersonal and small group violence

Policing of the G20 Protests Great Britain: Parliament: House of Commons: Home Affairs Committee, 2009-06-29 The policing of the G20 Protests in April 2009 was a remarkably successful operation more than 35 000 protesters demonstrated in the centre of London with a police presence of several thousand yet there was a minimum of disruption Aside from a few high profile incidents the policing of the G20 Protests passed without drama However these incidents and the tactics that led to them caused considerable adverse comment and have the potential to damage the public s faith in the police The use of containment detaining people in a confined area for a sustained period of time and distraction tactics the controlled use of force against those who appear hostile while legitimate according to the police rule book shocked the public Whether they should continue to be used must form the basis of a wide ranging discussion on the future policing of public protests Police communications with the media and the protesters must also improve This would require the police media and protesters to

engage better with one another both before and during the protest There are no circumstances in which it is acceptable for officers not to wear identification numbers and urgent action must be taken to ensure that officers have the resources to display identification at all times those officers found to be consciously removing their identification numbers must face the strongest possible disciplinary measures While the vast majority of officers on duty performed very well the Committee is concerned that untrained and inexperienced officers were placed in such a highly combustible atmosphere It cannot condone the use of untrained inexperienced officers on the front line of a public protest and feel that an element of luck must be attributed to the success of the operation
