repetitive motifs found on preliterate art objects Schmandt Besserat then demonstrates art's reciprocal impact on the development of writing She shows how beginning in 2700-2600 BC the inclusion of inscriptions on funerary and votive art objects emancipated writing from its original accounting function To fulfill its new role writing evolved to replicate speech this made it possible to compile organize and synthesize unlimited amounts of information Schmandt Besserat's pioneering investigation documents a turning point in human history when two of our most fundamental information media reciprocally multiplied their capacities to communicate When writing met art literate civilization was born **Country Life**, 1922
