Poverty Inequality And Development:

Poverty, Inequality, and Development Gary S. Fields, 1979 **Poverty, Inequality, and Development** Gary S. Fields, 1980-12-31 Economists have traditionally concentrated on aggregate economic growth to measure a country's development but previously they have also considered income distribution performance In this book Gary Fields reverses conventional approaches by using income distribution as the primary indicator He examines what is known about the distribution of income and poverty inequality and development He explores the main causes of poverty and inequality and the extent to which they have been reduced by individual countries in the course of their economic growth Recognizing that conclusions vary with the type of income distribution measure used Fields proposes that changes in absolute poverty be adopted as the primary index of a developing nation's progress and suggests that the growth rate of the GNP and character of that growth be regarded as the principal determinants of the levels of poverty and inequality This framework calls for new models new data and new microanalytic techniques in order to understand the results of development efforts Fields employs evidence from case studies of six developing nations to suggest some explanations for differing patterns of development and calls for development planning founded on a firm commitment to helping the poor **Poverty, Inequality and Development** Alain de Janvry, Ravi Kanbur, 2006-06-09 This collection of essays honors a remarkable man and his work Erik Thorbecke has made significant contributions to the microeconomic and the macroeconomic analysis of poverty inequality and development ranging from theory to empirics and policy The essays in this volume display the same range As a collection they make the fundamental point that deep understanding of these phenomena requires both the micro and the macro perspectives together utilizing the strengths of each but also the special insights that come when the two are linked together After an overview section which contains the introductory chapter and a chapter examining the historical roots of Erik Thorbecke's motivations the essays in this volume are grouped into four parts each part identifying a major strand of Erik's work Measurement of Poverty and Inequality Micro Behavior and Market Failure SAMs and CGEs and Institutions and Development The range of topics covered in the essays written by leading authorities in their own areas highlight the extraordinary depth and breadth of Erik Thorbecke's influence in research and policy on poverty inequality and development Acknowledgements These papers were presented at a conference in honor of Erik Thorbecke held at Cornell University on October 10 11 2003 The conference was supported by the funds of the H E Babcock Chair in Food Nutrition and Public Policy and the T H Lee Chair in World Affairs at Cornell University [Poverty, Inequality, and Development](#) Gary S. Fields, 1977 [Poverty, Inequality and Development](#) Alain De Janvry, S. M. Ravi Kanbur, 2005 **Poverty, Inequality and Rural Development** David Greenaway, Tim Lloyd, Oliver Morrissey, 1994-07-12 Poverty alleviation is a major objective of development More than a fifth of the world's population lives in absolute poverty and the majority of the poor live in rural areas This volume studies what can be done for alleviating rural poverty Four chapters address the measurement of poverty

and inequality including the use of household expenditure surveys and intra household income distribution Evidence is presented for India Mauritania Cte d Ivoire and China Other chapters present case studies on strategies for rural development provision of rural credit in Bangladesh and India technical change in Philippine agriculture contract farming in Thailand and banana growers in the Windwards The contributions introduce the problems of rural development and show that effective rural development is assisted by investment in education and secure access to credit that equity is important for incentives but not directly related to poverty and that technical and institutional reform are essential but require careful design and implementation

Growth, Inequality, and Poverty Anthony Shorrocks, Rolph van der Hoeven, 2004-03-04 This is a collection of papers examining the pressing issue of increasing inequality in the distribution of income in developing countries While economic growth is a prerequisite for a sustained reduction in poverty policies aimed at raising growth rates are often associated with a range of adverse short term effects including rising unemployment greater economic insecurity environmental degradation and the weakening of traditional social safety nets Pro poor growth strategies attempt to address these short term problems But the ideal mix of policies and their impact on the prospects for poverty reduction in the longer run remain controversial topics Growth Inequality and Poverty comprises many of the most important contributions to the current debate

Adams, 1991-01-01 Study based on a household survey conducted by the International Food Policy Research Institute IFPRI between September 1986 and May 1987 in three villages in the Minya governate

Poverty, Inequality, and the Measurement of Development Performance Gary S. Fields, 1977

Poverty, Inequality and Development D. N. Singh, Tara Devi Singh, 1994

The End of Poverty Peter Edward, Andy Sumner, 2019-04-23 In this book Edward and Sumner argue that to better understand the impact of global growth on poverty it is necessary to consider what happens across a wide range of poverty lines Starting with the same datasets used to produce official estimates of global poverty they create a model of global consumption that spans the entire world s population They go on to demonstrate how their model can be utilised to understand how different poverty lines imply very different visions of how the global economy needs to work in order for poverty to be eradicated

Poverty, Population, Inequality, and Development in Historical Perspective Alberto Chilos, 2012 Seen in historical perspective the main economic predicaments of the present world such as poverty inequality backwardness appear in a somewhat different light than in many current discussions especially by sociologists radical economists and political scientists In the present paper the achievements of the modern age and in particular of the post World War II period are considered in the perspective of economic and demographic history and in their connection with the contemporary systems of production and of international relations Some considerations concerning future possible developments conclude the paper

Poverty, Inequality, and Evaluation Ray C. Rist,Frederic P. Martin,Ana María Fernandez,2015-10-20 The basic premise of this book is that the conversation on the future of development needs to shift from a focus on poverty to that of inequality The poverty emphasis is in an intellectual and political cul de sac It does not address the fundamental question of why people are poor nor what can be done structurally and institutionally to reduce and eliminate it The various chapters illustrate in the context of various countries and sectors around the world the significant contributions that evaluators can make in terms of improvement of the analytical framework analysis of the performance and results of specific programs and projects as well as assessing and designing better public management systems in terms of poverty and inequality reduction Beyond the specific

contributions presented three characteristics characterize those evaluations to be relevant for poverty and inequality analysis a global local approach Global to move beyond disciplinary boundaries and consider cross cutting issues local to account for the diversity of countries sectors institutions and cultures considered a problem solving orientation The issue evaluated is the core focus and determines the choice of evaluation methods to analyze this issue from a variety of angles an evolutionary approach Chapters presented are from iconoclasts who do not have any pre established theory or school of thought to defend This is the result of openness of mind and ability to adapt the analytical framework the evaluation methods and the interpretation of results in a constant interaction with the stakeholders Such characteristics make evaluation a domain that can help understand better complex issues like poverty inequality vulnerability and their interactions as well as propose a relevant and useful theory of change for public policies and projects to improve the plight of a large part of the world population in industrialized and developing countries alike
