McCanney,2004      **Ephod of God** Joan Angley,2020-06-18 Teach them the difference between the holy and the profane between the clean and unclean Teach them all the word God has given Leviticus 10 10 Emeralds sapphires diamonds What do precious gems have to do with God Everything if you study the high priest breastplate and decode the message Proverbs 25 2 says It is the glory of God to conceal a thing but the glory of kings is to search a thing out There is much more buried deep in the scriptures than we know It is a deep well of treasure waiting to be mined and just as precious as sapphires and diamonds How does God see these jewels Does the Hebrew name for ruby written three thousand years ago mean flaming sword of light and does it hint at the laser hidden inside its depths Do these gems represent anything important and of great value Absolutely Is there a secret and mysterious meaning imbedded in the fact that God assigned a jewel to each tribe of Israel accompanied by two very specific blessings and a tribal banner which surprisingly has an astronomical significance Jesus said that before He comes back there will be signs in the sun moon and stars Do these constellations depicted in the tribal banners tell us something of great import for the world Are there warnings broadcast in the stars that we should be paying attention to them now Buckle up and begin one of the most fascinating journeys into the mysteries of God      **Unholy Alliance** Bonnie Meyer,2007-03 An unholy alliance was signed between the negative aliens and the secret world government in Europe in 1572 and with the US in 1946 The secret governments knew with whom they were dealing but were not aware they were being deceived Humans traded for alien technology Alien provided technology used for manufacturing diseases Underground and underwater alien bases and tunnel systems Global satellite and electronic surveillance Earth changes and weather manipulation US government has built UFOs Global impact of personal choices      Earth's Changing Climate Antony Milne,1989 Emphasises the importance of extraterrestrial forces as the prime mover in weather patterns      *The Giza Death Star Destroyed* Joseph P. Earthshaker John Benjamin,2012-10 What in the world is going on Almost overnight our modern world has entered into a period of great change very suddenly and unexpectedly with the largest and most violent storms earthquakes solar flares flooding droughts severe weather anomalies and earth changes than the greater majority of us have ever experienced in our lifetimes The largest drought ever recorded in America s history struck so quickly in 2012 that it was called a flash drought

encompassing over half of the entire nation The full extent of the damage that this has caused through crop loss has yet to be realized on the world s markets but there will most certainly be food shortages soon and prices are already beginning to skyrocket worldwide Water shortages and actual water wars are also beginning to occur The rest of the entire world is also experiencing these same disastrous events Gigantic earthquakes are happening worldwide causing untold destruction So many people have lost their lives or have been displaced by these unexpected tragedies that there is simply no way to account for them all India had a power outage so great that seven hundred million people were without electricity for weeks and people worldwide fear that something of this same magnitude may also strike their area in the very near future What in the world is going on here This book provides the answer to this question and gives sound advice on what you can do to prepare yourself as well as your family and friends to survive the even more severe earth events that may be set to occur shortly in our modern rapidly changing world It is my earnest hope that this book will be a great help and source of strength for you in the uncertain times that lie directly ahead John Benjamin

**The Fourth Source** Robert J. Tuttle, 2012 This book describes how the effects of nature s own nuclear reactors have shaped the Earth the Solar System the Universe and the history of life as we know it It focuses on observed effects that are poorly explained by our standard theories identifies certain errors in those theories and shows how these effects are caused by natural nuclear fission reactors The theory of Plate Tectonics is wrong and it is shown that expansion of the Earth causes continental drift A physically reasonable mechanism is proposed for expansion and observational data are presented to show that this occurs Evolution is explained as punctuated equilibrium with mutations caused by abrupt surges of radiation and related life forms that have been interpreted as separate species are actually the result of radiation injury This view is particularly effective as applied to humans The ability of the dinosaurs to live so large is explained by use of Earth Expansion and a more massive atmosphere to provide buoyancy and effective transpiration of oxygen These effects also explain how pterodactyls and ancient birds could fly Expansion induced by impacts at the end of the Cretaceous caused the atmosphere to thin and the dinosaurs collapsed Analysis of geological and biological data supports this The astronomical distance scale is shown to be wrong based on the misconception that trigonometric parallax is an absolute measurement It isn t and the method is led astray by the overwhelming number of asteroidal fragments masquerading as stars The measurements of an expanding Universe are shown to be in error and an expanding Universe is not needed by an alternative interpretation of Einstein s equations This interpretation is based on the equal creation of matter and antimatter which is known to occur Spiral galaxies are not vast Island Universes of stars as we have thought but are shown to be the strewn fields of debris from the nuclear fission detonation of distant planets The Universe is not made up of 96% Dark Matter and Dark Energy but is instead very ordinary Abundant evidence and references provide support for all these interpretations This book opens new opportunities for research by correcting several fundamental errors in our concepts of the Earth Life and the Universe
