Force of Nature Sajal Nag,2017-08-07 The study of environmental history is no more only of forests rivers but also of agriculture climate economic practices and human culture In recent times environmental studies as a discipline has come to the forefront with growing concerns over the ozone layer depletion but has led to investigation of the historical

factors and processes of man and environment relationship and its impact Very little was earlier known about the devastating impact on the environment of imperialism state capitalism of post colonial nations and the liberalization and globalization of these economies There is no aspect of the environment which has not felt the impact of such developmental human process Rivers have thus either dried up or are polluted with highly toxic materials seas and oceans have become the dumping ground of nuclear and other wastes streams are blocked rains reduced forest covers depleted wildlife has dwindled concrete jungles have replaced green fields and natural water bodies desertification of landscapes has happened It has had its own impact on human life as well Droughts floods dust storms landslides water shortage agricultural decline and food crisis starvation and epidemics followed The planet earth and its inhabitants are currently in the throes of the most devastating man made crisis for survival In an attempt to enhance our understanding of the environmental crisis the present collection has essays investigating wide ranging events ranging from understanding climate from logbook of East India Company to the construction of Himalayan tropics environmental cost of damming the Damodar River to water politics of south India impact of Tsunami of the years 1737 as well as of 2004 5 politics over earthquake rehabilitation to the Sarna movements of eastern Indian tribals

The Rhetorical Nature of XML J.D. Applen,Rudy McDaniel,2009-09-10 The Rhetorical Nature of XML is the first volume to combine rhetoric XML and knowledge management in a substantive manner It serves as a primer on XML and XML related technologies illustrating how the naming of XML elements can be understood as a rhetorical act and detailing the essentials of knowledge management practices that illustrate the need for intelligently conceived databases in organizations Authors J D Applen and Rudy McDaniel explain how technical knowledge and rhetorical knowledge are symbiotic assets in the modern information economy emphasizing that skilled professionals and apprentice learners must not only adapt to and become adept with new technological environments but they must also remain aware of the dynamic social and technological contexts through which they communicate Applen and McDaniel use this subject as a catalyst to encourage interdisciplinary connections and projects between experts in fields such as technical communication digital media library science computer science and information technology The authors demonstrate techniques for working with XML in interdisciplinary projects with attention to single sourcing and content management Interviews with practitioners working with XML for research and in industry are also included to illustrate how XML is currently being used in a variety of disciplines such as technical communication and digital media Combining applied theory and XML technology to solve real world problems in technical communication and digital media this work provides an entry point for students and practitioners who do not have an extensive background in markup languages enabling them to begin developing user centric projects using XML Visit the book s companion web site <http://rhetoricalxml.com>

The Nature and Direction of Learning William Henry Burton,1929 As the title indicates a considerable portion of this book is devoted to a consideration of the learning process It

is a text that deals more with the theory of method than with the details of classroom procedure The treatment of the direction of learning occupies nearly three fourths of the book and covers the topics commonly discussed by writers in this field Interestingly the author divides this book into five units each of which is subdivided into several problems The typical treatment of a problem includes four phases 1 exploratory and pretest questions 2 a discussion of the problem 3 discussion questions for summarizing and testing and 4 a list of parallel readings The exploratory and pretest questions a distinctive characteristic of this volume are ingenious and serve to stimulate thinking about the problems considered This book with its treatment of methods of teaching should be a highly effective instrument for use in the professional training of teachers
