Nonequilibrium Processes In Catalysis:

Nonequilibrium Processes in Catalysis Oleg V. Krylov, 2018-01-18 *Nonequilibrium Processes in Catalysis* presents modern ideas and experimental data e g molecular beams laser technique on adsorption and catalysis the mechanism of energy exchange in the processes of particles interaction with a surface and the lifetimes of excited particles on a surface Previously unpublished theoretical information regarding the principle of chemoenergetical stimulation accounting for the acceleration of one reaction at the expense of reactant excitation in another is provided and new ideas about nonequilibrium surface diffusion are explored Examples of the formation of nonequilibrium dissipative structures in catalysis are presented including auto oscillations auto waves multiplicity of kinetic regimes nonequilibrium phase transition and decelerated electron exchange between solid and adsorbed species The book also describes new experimental methods for studying nonequilibrium and quick processes in catalysis *Nonequilibrium Processes in Catalysis* will benefit physicists involved with surface science chemists involved with adsorption and catalysis engineers vacuum scientists physical chemists materials chemists students and others interested in these processes *Nonequilibrium Processes in Catalysis* OV. Thermodynamics of Non-Equilibrium Processes for Chemists with a Particular Application to Catalysis V.

Parmon, 2009-09-26 *Thermodynamics of Non Equilibrium Processes for Chemists with a Particular Application to Catalysis* consists of materials adapted from lectures on the thermodynamics of nonequilibrium processes that have been taught at the Department of Natural Sciences of Novosibirsk State University since 1995 The thermodynamics of nonequilibrium processes traditionally required students to have a strong background in physics However the materials featured in this volume allow anyone with knowledge in classical thermodynamics of equilibrium processes and traditional chemical kinetics to understand the subject Topics discussed include systems in the thermodynamics of irreversible processes thermodynamics of systems that are close to and far from equilibrium thermodynamics of catalysts the application of nonequilibrium thermodynamics to material science and the relationship between entropy and information This book will be helpful for research into complex chemical transformations particularly catalytic transformations Applies simple approaches of non equilibrium thermodynamics to analyzing properties of chemically reactive systems Covers systems far from equilibrium allowing the consideration of most chemically reactive systems of a chemical or biological nature This approach resolves many complicated problems in the teaching of chemical kinetics Heterogeneous Catalysis Georgii Konstantinovich

Boreskov, 2003 Table of contents **Bimodal Oxidation** Robert Bakhtchadjian, 2019-11-15 This book is devoted to the problems of oxidation chemical reactions and addresses bimodal reaction sequences Chemical reactions of oxidation occurring under certain conditions and in multicomponent systems are complex processes The process of the oxidation essentially changes in the presence and contact of the solid substances with reactants The role of solid substances and the appearance of this phenomenon in oxidation reaction are discussed The reader will understand the driving forces of this

phenomenon and apply it in practice Written for chemists physicists biologists and engineers working in the domain of oxidation reactions Key Selling Features Covers the historical background modern state of the art and perspectives in investigations of the coupling between heterogeneous and homogeneous reactions Discusses the feasible pathways of the coupling of heterogeneous and homogeneous reactions in oxidation in man made and natural chemical systems Addresses the abundance peculiarities and mechanisms of the bimodal reaction sequences in oxidation with dioxygen in recent decades Discusses the existence of the bimodal reaction sequences in chemical systems investigations in atmospheric chemistry and heterogeneous photocatalysis Presented in a simple concise style accessible for both specialists and non specialists
