Signification Intention:

Meaning and Language: Phenomenological Perspectives Filip Mattens, 2010-02-18 The work aims at presenting new in depth research on core topics of Husserl's thinking related to language e.g. meaning sign ideality supplemented with a variety of original phenomenological reflections on pre-linguistic experience concept formation and the limitations of verbal expression In doing so it supplies us the first anthology that focuses on Husserl's thinking in relation to language Most of the contributions to this volume are based on research originally presented at the Husserl Arbeitstage which took place at the Husserl Archives Leuven in November 2006 In addition two other articles have been added in order to supplement the themes of the presentations

Historical Dictionary of Husserl's Philosophy John J. Drummond, 2022-03-14 Edmund Husserl is generally regarded as the founding figure of the philosophical movement of phenomenology by which he understands a descriptive science of the essential structures of experiences and of their objects precisely as these are experienced Phenomenology has had a decisive influence on philosophy in the 20th century especially in Europe The movement known as continental philosophy whether practiced in Europe or elsewhere has its roots in phenomenology and in the post-Hegelian philosophies of Søren Kierkegaard Friedrich Nietzsche and Karl Marx Historical Dictionary of Husserl's Philosophy Second Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross-referenced entries on his key concepts and major writings as well as entries on his most important predecessors contemporaries and successors This book is an excellent resource for students researchers and anyone wanting to know more about Edmund Husserl

The Essential Husserl Edmund Husserl, 1999-05-22 The Essential Husserl the first anthology in English of Edmund Husserl's major writings provides access to the scope of his philosophical studies including selections from his key works Logical Investigations Ideas I and II Formal and Transcendental Logic Experience and Judgment Cartesian Meditations The Crisis of European Sciences and Transcendental Phenomenology and On the Phenomenology of the Consciousness of Internal Time The collection is an indispensable resource for anyone interested in twentieth century philosophy

Reconsidering Difference Todd May, 1997 French philosophy since World War II has been preoccupied with the issue of difference Specifically it has wanted to promote or to leave room for ways of living and of being that differ from those usually seen in contemporary Western society Given the experience of the Holocaust the motivation for such a preoccupation is not difficult to see For some thinkers especially Jean-Luc Nancy Jacques Derrida Emmanuel Levinas and Gilles Deleuze this preoccupation has led to a mode of philosophizing that privileges difference as a philosophical category Nancy privileges difference as a mode of conceiving community Derrida as a mode of conceiving linguistic meaning Levinas as a mode of conceiving ethics and Deleuze as a mode of conceiving ontology Reconsidering Difference has a twofold task the primary one critical and the secondary one reconstructive The critical task is to show that these various privilegings are philosophical failures They wind up for reasons unique to each endorsing position

that are either incoherent or implausible Todd May considers the incoherencies of each position and offers an alternative approach His reconstructive task which he calls contingent holism takes the phenomena under investigation community language ethics and ontology and sketches a way of reconceiving them that preserves the motivations of the rejected positions without falling into the problems that beset them
