Privatization and Educational Choice Myron Lieberman, 1989 This book describes how and why educational choice movements will affect public education It uses a public choice approach to argue that both the supporters and opponents of private and school choice have failed to address several critical issues Following an introductory chapter chapter 2 is devoted to the rationale for contracting out instructional services its development in other public services and its advantages and disadvantages Chapter 3 focuses on two issues critical to all forms of privatization comparative costs and the evaluation of outcomes The fourth chapter examines previous efforts to contract out instruction and issues for making such efforts more effective Chapter 5 discusses educational vouchers and the broader political and intellectual controversy over whether certain services should be provided through our political or our economic system Competition issues raised by voucher proposals are discussed in the sixth chapter and chapter 7 takes up four independent arguments for vouchers The eighth chapter presents a political analysis of voucher plans and an assessment of their chances for enactment Chapter 9 discusses whether or not privatization will develop as a cottage industry or as a large scale enterprise and explores the possibilities of franchising certain kinds of educational services Proposals for the withdrawal of government support for and provision of education load shedding are analyzed in the 10th chapter with a focus on home schooling The final chapter analyzes the ethical and professional issues raised by privatization

Hard Lessons

Carol Ascher,Robert Berne,Norm Fruchter,1996 This book the second in the Twentieth

Century Fund's series of studies on the privatization of public services finds that current arguments for privatizing schools are based on wishful thinking. After examining what the actual experience has been with privatization around the country, *Hard Lessons* concludes that the promise of saving money and improving educational quality through privatization is at minimum being oversold. While this report is likely to be disputed by those who have a strong attachment to the notion that privatizing always improves output and by those with a financial stake in the for-profit school industry, it will be an important part of the ongoing debate. The report, which focuses on big city schools, argues that while the magic wand of privatization must be abandoned, the efforts to solve the problems facing our nation's urban schools must continue. There are hard questions to be asked, new solutions to be tried, and the case must continually be made for new resources for our public schools even in today's political climate.
