Narrative Experiments The Discursive Authority Of Science And Technology:

Narrative Experiments Gayle L. Ormiston, Raphael Sassower, 1989 *Narrative Experiments* was first published in 1989 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In *Narrative Experiments* Gayle Ormiston and Ralph Sassower bring a refreshing perspective to the domains of inquiry we call science and technology asserting that traditional definitions like classical idealism and materialism fail to suggest the rich and complex cultural linguistic interplay occurring between them This context is not merely a background nor is Ormiston and Sassower s just one more interdisciplinary approach to the subject Instead their book argues science technology and the humanities developed in concert with one another and their reciprocity obliterates all traditional disciplinary boundaries Ormiston and Sassower build their case by devoting a chapter to each of the four themes emerging from the etymological introduction First they look at the role fiction and other literary modes play in developing our attitudes toward science and technology how the visions of Bacon Hobbes Galileo Rousseau Mary Shelley and Orwell evoke both anxiety and hope Next they examine a series of eighteenth century fictions the Enlightenment texts of Kant Rousseau and Hume and the elevated but ambiguous status science and technology associated with them The last two chapters evaluate modes of discursive authority and its dissemination classical and modern extralinguistic approaches the contemporary linguistic view espoused by Rorty Quine and others and their own avowedly experimental journey through the labyrinths of cultural and linguistic usage *From Artifact to Habitat* Gayle L. Ormiston, 1990 Bringing together philosophy literary criticism and textual theory social and political theory and the philosophy of language and cognitive science this collection intends to establish an interpretive framework for exploring the ubiquity and mediacy of technology *Imagination* José Van Dijck, 1998-01-31 Genetics seems more popular than ever DNA technology not only sustains large areas of biomedicine and business but also prevails in social and legal practices and takes root in cultural products Since the late 1950s the public image of genetics metamorphosed from a suspect branch of research into a thriving well funded field of biomedicine Images and imaginations have played a crucial role in the popularization of genetic knowledge The media played up images of engineered bugs scientists promoted images of selfish genes and science fiction writers infested the imagination with stories of cloned monsters *Imagination* examines the role of science journalism and fiction in the popularization of genetics **Narrative in Health Care** John D. Engel, 2008 The authors of this work a social scientist a physician executive a counselor and a nurse are the engineers of a shift in culture curriculum and practice at Summa Health System a large health system affiliated with the Northeastern Ohio Universities College of Medicine Here they examine narrative healthcare practices within frameworks derived from the social sciences psychology phenomenology and autobiographical theory They relate the development of narrative medicine to relationship centered care arguing that narrative medicine can help physicians to develop the skills required to practice relationship centered care such as reading

and telling complex stories writing reflectively compassionate presence and exercising the moral imagination Continental Philosophy in the 20th Century Richard Kearney,2003 Continental philosophy is one of the 20th century s most important challenging philosophical movements *Routledge History of Philosophy Volume VIII* Richard Kearney,2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchquilt of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990 s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of philosophical scientific and other cultural events **Challenging Social Injustice** Russell L. Ensign,Louis Patsouras,1993 **Molecular Biology in Narrative Form** Priya Venkatesan,2005 **Science, Technology and Society** ,1990 □□□□ ,2000 **Technology and Values** Craig Hanks,2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics **The Politics of Western Science, 1640-1990** Margaret C. Jacob,1994 On the influence of politics upon the practice and dissemination of science First published as *Social Research* v 59 no 3 Fall 1992 Annotation copyright by Book News Inc Portland OR Jean-François Lyotard Derek Robbins,2004 *The Sense of Chaos* Marcella Mahony Greening,1993 Nanoculture N. Katherine Hayles,2004 Nano denotes a billionth a nanometer is a billionth of a meter New instrumentation and techniques have for the first time made possible materials research and engineering at this level the scale of individual molecules and atoms Extraordinary visions of material abundance unprecedented materials and powerful engineering capabilities have marked the arrival of nanotechnology as well as dystopian scenarios of self replicating devices

running amok and causing global catastrophe Largely a future possibility rather than present actuality nanotechnology has become a potent cultural signifier NanoCulture explores the ways in which nanotechnology interacts with and itself becomes a cultural construction Topics include the co construction of nanoscience and science fiction the influence of risk assessment and nanotechnology on the shapes of narratives intersections between nanoscience as a writing practice and experimental literature at the limits of fabrication the Alice in Wonderland metaphor for nanotechnology and the effects of mediation on nanotechnology and electronic literature NanoCulture is produced in collaboration with the nano art exhibit at the Los Angeles County Museum of Art December 2003 September 2004 created by an interdisciplinary team led by media artist Victoria Vesna and nanoscientist James Gimzewski NanoCulture is richly illustrated with images from the nano exhibit which also provides the basis for an ethnographic analysis of collaborative process and an exploration of changing concepts of museum space The dynamic uniting these diverse perspectives is boundary crossing between art science and literature cultural imaginaries scientific facts and technological possibilities actual virtual and hybrid spaces the science of fictions and the fictions of science and utopian dreams material constraints and dystopian nightmares The first book length study focus on cultural implications of nanotechnology NanoCulture breaks new ground in showing the importance of the new technoscience to contemporary culture and of culture to the development interpretation and future of this technoscience

Giambattista Vico and the Cognitive Science Enterprise Marcel Danesi,1995 Perhaps the oldest and most intriguing conundrum of all is the question What is the mind In the last decade an interdisciplinary approach known as cognitive science has emerged to study the mind with the ideas and methods forged by artificial intelligence researchers The aim of this book is to suggest ways in which the cognitive science agenda can be shaped more meaningfully according to a view of mind proposed by Giambattista Vico two and a half centuries ago This view is grounded on the products of imagination By studying myths poetry narrations etc the cognitive scientist will discover the creative force behind them **Discours Social**,1990 **Competing Truths** Richard J. Coleman,2001-08 Richard Coleman pushes both scientists and theologians past the paradigms of comparison and contrast opposition and competition and argues that two disciplines must challenge each other as each seeks to find truth from its own particular tradition **The Journal of Philosophy**,1990 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 *The Philosopher's Index*,2008 Vols for 1969 include a section of abstracts
