Classical and Quantum Dynamics Walter Dittrich, Martin Reuter, 2001-06-18 Physics students who want to become familiar with advanced computational strategies in classical and quantum dynamics will find here a detailed treatment many worked examples This new edition has been revised and enlarged with chapters on the action principle in classical electrodynamics on the functional derivative approach and on computing traces

A Resolution Principle for a Logic with Restricted Quantifiers Hans-Jürgen Bürckert, 1991 This monograph presents foundations for a constrained logic scheme treating constraints as a very general form of restricted quantifiers The constraints or quantifier restrictions are taken from a general constraint system consisting of constraint theory and a set of distinguished constraints The book provides a calculus for this constrained logic based on a generalization of Robinson's resolution principle Technically the unification procedure of the resolution rule is replaced by suitable constraint solving methods The calculus is proven sound and complete for the refutation of sets of constrained clauses Using a new and elegant generalization of the notion of a ground instance the proof technique is a straightforward adaptation of the classical proof technique The author demonstrates that the constrained logic scheme can be instantiated by well known sorted logics or equational theories and also by extensions of predicate logics with general equational constraints or concept description languages

Algebraic Methods II: Theory, Tools and Applications Jan A. Bergstra, Loe M.G. Feijs, 1991-04-10 The proper treatment and choice of the basic data structures is an important and complex part in the process of program construction Algebraic methods provide techniques for data abstraction and the structured specification validation and analysis of data structures This volume originates from a workshop organized within ESPRIT Project 432 METEOR An Integrated Formal Approach to Industrial Software

Development held in Mierlo The Netherlands September 1989 The volume includes five invited contributions based on workshop talks given by A Finkelstein P Klint C A Middelburg E R Olderog and H A Partsch Ten further papers by members of the METEOR team are based on talks given at the workshop The workshop was a successor to an earlier one held in Passau Germany June 1987 the proceedings of which were published as Lecture Notes in Computer Science Vol 394

A Unified Approach to Interior Point Algorithms for Linear Complementarity Problems Masakazu Kojima, N. Megiddo, T. Noma, Akiko Yoshise, 1991-09-25 Following Karmarkar's 1984 linear programming algorithm numerous interior point

algorithms have been proposed for various mathematical programming problems such as linear programming convex quadratic programming and convex programming in general This monograph presents a study of interior point algorithms for the linear complementarity problem LCP which is known as a mathematical model for primal dual pairs of linear programs and convex quadratic programs A large family of potential reduction algorithms is presented in a unified way for the class of LCPs where the underlying matrix has nonnegative principal minors P0 matrix This class includes various important subclasses such as positive semi definite matrices P matrices P matrices introduced in this monograph and column sufficient matrices The family contains not only the usual potential reduction algorithms but also path following algorithms and a damped Newton method for the LCP The main topics are global convergence global linear convergence and the polynomial time convergence of potential reduction algorithms included in the family

Advances in Petri Nets 1991 Helmut Plünnecke, Wolfgang Reisig, 1991 The main idea behind the series of volumes Advances in Petri Nets is to present to the general computer science community recent results which are the most representative and significant for the development of the area The papers for the volumes are drawn mainly from the annual International Conferences on Applications and Theory of Petri Nets Selected papers from the latest conference are independently refereed and revised and extended as necessary Some further papers submitted directly to the editor are included Advances in Petri Nets 1991 covers the 11th International Conference on Applications and Theory of Petri Nets held in Paris France in June 1991 The volume contains the Bibliography of Petri Nets 1990 prepared by H Plünnecke and W Reisig with over 4000 entries PUBLISHER S WEBSITE
