NEPA No. 70

ARTICLE 90 — INTRODUCTION

90-1. Purpose.

(a) The purpose of this Code is the practical safeguarding of persons and property from hazards arising from the use of electricity.

(b) This Code contains provisions considered necessary for safety. Compliance therewith and proper maintenance will result in an installation essentially free from hazard, but not necessarily efficient, convenient, or adequate for good service or future expansion of electrical use.

Hazards often occur because of overloading of wiring systems by methods or usage not in conformity with this Code. This occurs because initial wiring did not provide for increases in the use of electricity. An initial adequate installation and reasonable provisions for system changes will provide for future increases in the use of electricity.

(c) This Code is not intended as a design specification nor an instruction manual for untrained persons.

90-2. Scope.

(a) **Covered.** This Code covers:

(1) Electric conductors and equipment installed within or on public and private buildings or other structures, including mobile homes and recreational vehicles; and other premises such as yards, carnival, parking and other lots, and industrial substations.

(2) Conductors that connect the installations to a supply of electricity.

(3) Other outside conductors on the premises.

(b) **Not Covered.** It does not cover:

(1) Installations in automotive vehicles, other than mobile homes and recreational vehicles, ships, watercraft, railway rolling stock, or aircraft.

(2) Installations underground in mines.

(3) Installations of railways for generation, transformation, transmission, or distribution of power used exclusively for operation of rolling stock or installations used exclusively for signaling and communication purposes.

(4) Installations of communication equipment under the exclusive control of communication utilities, located outdoors or in building spaces used exclusively for such installations.

(5) Installations under the exclusive control of electric utilities for the purpose of communication, or metering; or for the generation, control, transformation, transmission, and distribution of electric energy located in buildings used exclusively by utilities for such purposes or
