*Lectures on the Nearest Neighbor Method* Gérard Biau,Luc Devroye,2015-12-08 This text presents a wide ranging and rigorous overview of nearest neighbor methods one of the most important paradigms in machine learning Now in one self contained volume this book systematically covers key statistical probabilistic combinatorial and geometric ideas for understanding analyzing and developing nearest neighbor methods G rard Biau is a professor at Universit Pierre et Marie Curie Paris Luc Devroye is a professor at the School of Computer Science at McGill University Montreal      **Data**

**Structures, Near Neighbor Searches, and Methodology** Michael H. Goldwasser,David S. Johnson,Catherine C. McGeoch, This book presents reviewed and revised papers from the fifth and sixth DIMACS Implementation Challenge workshops These workshops held approximately annually aim at encouraging high quality work in experimental analysis of data structures and algorithms The papers published in this volume are the results of year long coordinated research projects and contain new findings and insights Three papers address the performance evaluation of implementations for two fundamental data structures dictionaries and priority queues as used in the context of real applications Another four papers consider the still evolving topic of methodologies for experimental algorithmics Five papers are concerned with implementations of algorithms for nearest neighbor search in high dimensional spaces an area with applications in information retrieval and data mining on collections of Web documents DNA sequences images and various other data types      Case-Based Approximate

Reasoning Eyke Hüllermeier,2007-03-20 Making use of different frameworks of approximate reasoning and reasoning under uncertainty notably probabilistic and fuzzy set based techniques this book develops formal models of the above inference principle which is fundamental to CBR The case based approximate reasoning methods thus obtained especially emphasize the heuristic nature of case based inference and aspects of uncertainty in CBR      Computer Analysis of Images and Patterns Walter Kropatsch,Martin Kampel,Allan Hanbury,2007-08-18 The refereed proceedings of the 12th International Conference on Computer Analysis of Images and Patterns are presented in this volume The papers cover motion detection and tracking medical imaging biometrics color curves and surfaces beyond two dimensions reading characters words and lines image segmentation shape image registration and matching signal decomposition and invariants and features and classification

*Computer Analysis of Images and Patterns* Vaclav Hlavac,Radim Sara,1995-08-23 This book presents the proceedings of the Sixth International Conference on Computer Analysis of Images and Patterns CAIP 95 held in Prague Czech Republic in September 1995 The volume presents 61 full papers and 75 posters selected from a total of 262 submissions and thus gives a comprehensive view on the state of the art in computer analysis of images and patterns research design and advanced applications The papers are organized in sections on invariants segmentation and grouping optical flow model recovery and parameter estimation low level vision motion detection structure and matching active vision and shading human face
